

## 1.1 Black Box Testcases

### 1.1.1 Create Interface

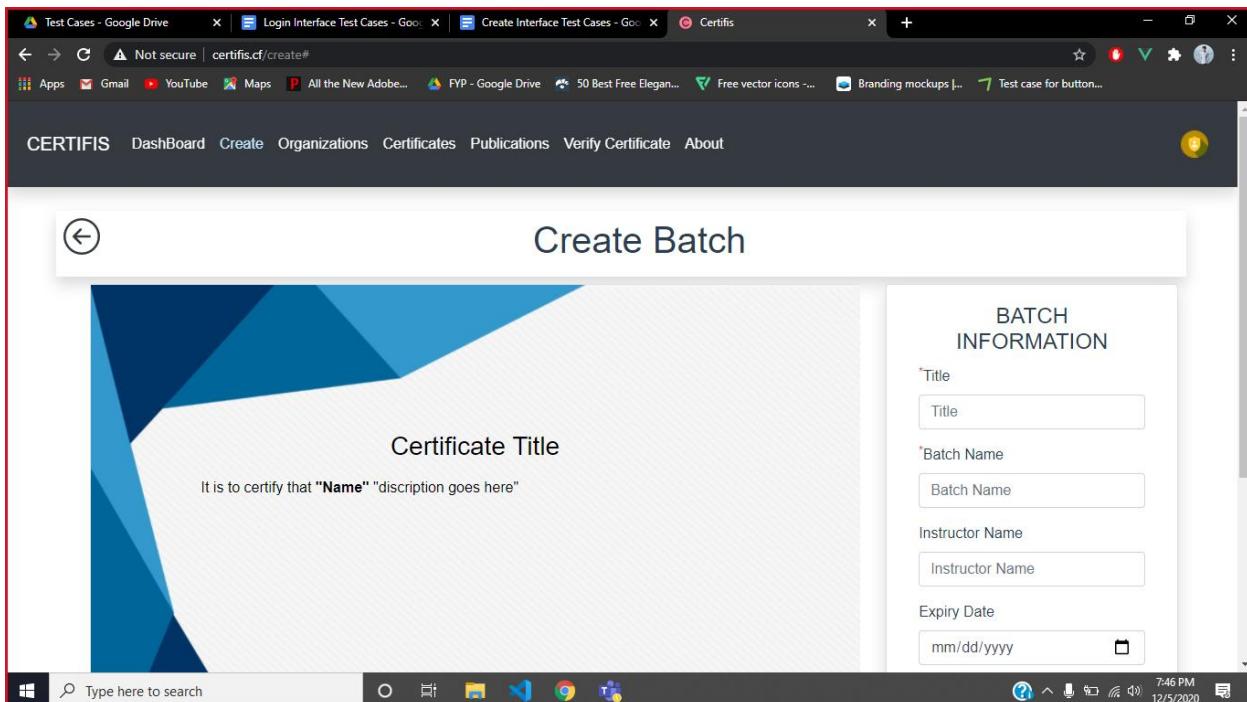

The screenshot displays two nearly identical screenshots of a web application interface for creating a certificate. Both screenshots are framed by a red border and show a browser window with multiple tabs open.

**Screenshot 1 (Top):**

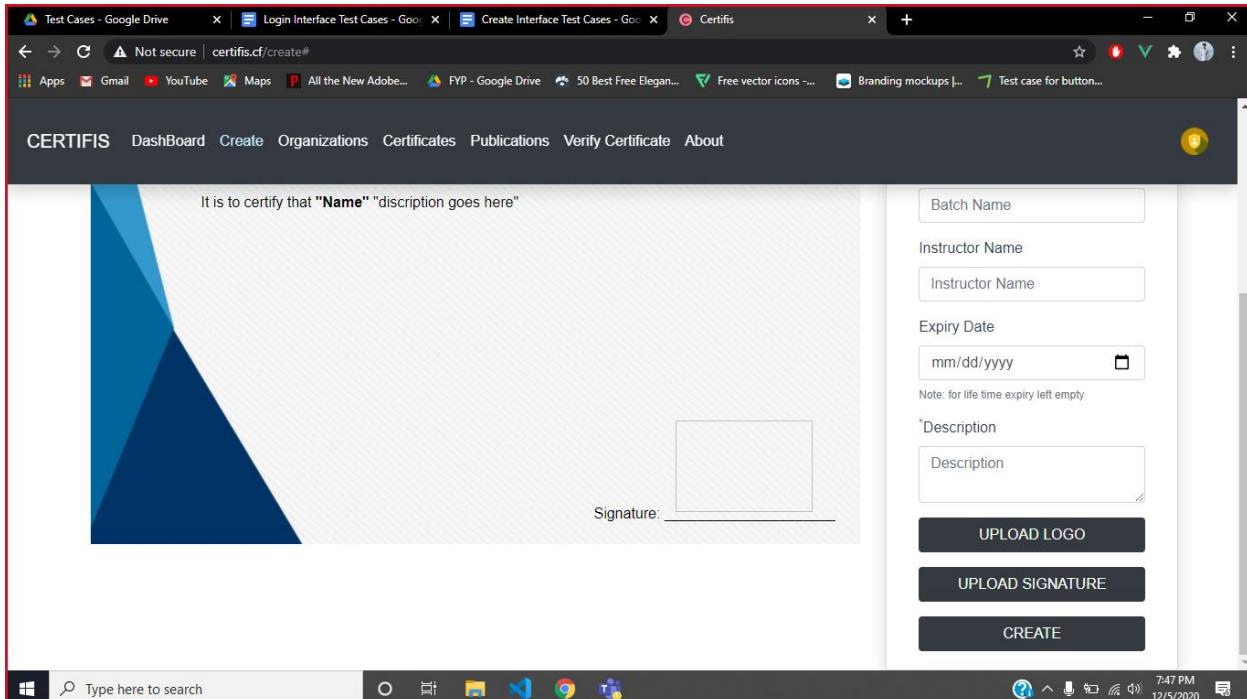

- Left Panel:** Displays a placeholder for a certificate image with the title "Certificate Title" and the text "It is to certify that "Name" "description goes here".
- Right Panel:** Titled "CERTIFICATE INFORMATION". It contains four input fields with asterisks: "Title", "Candidate Name", "Candidate Email", and "Instructor Name".

**Screenshot 2 (Bottom):**

- Left Panel:** Displays a placeholder for a certificate image with the title "Certificate Title" and the text "It is to certify that "Name" "description goes here".
- Right Panel:** Titled "CERTIFICATE INFORMATION". It contains four input fields with asterisks: "Candidate Email", "Instructor Name", "Expiry Date" (a date picker), and "Description". Below these are three buttons: "UPLOAD LOGO", "UPLOAD SIGNATURE", and "CREATE".

The screenshot shows the 'Create Batch' page. On the left, there is a large blue and white geometric background image. In the center, the title 'Certificate Title' is displayed above the placeholder text 'It is to certify that "Name" "description goes here"'. To the right, a form titled 'BATCH INFORMATION' contains several input fields: 'Title' (empty), 'Batch Name' (empty), 'Instructor Name' (empty), and an 'Expiry Date' field with the placeholder 'mm/dd/yyyy'.

The second screenshot shows the same 'Create Batch' page after the user has filled in the fields. The 'Batch Name' field now contains 'Batch Name', the 'Instructor Name' field contains 'Instructor Name', and the 'Expiry Date' field contains 'mm/dd/yyyy'. Below these fields, a note says 'Note: for life time expiry left empty'. At the bottom of the form, there are three buttons: 'UPLOAD LOGO', 'UPLOAD SIGNATURE', and 'CREATE'.

### 1.1.1.1 Controls

- Button (View).
- Button (Start).
- Button (Single Certificate).
- Button (Batch Certificate).
- Button (Back).
- Textbox (Title).

- Textbox (Candidate Name).
- Textbox (Candidate Email).
- Textbox (Instructor Name).
- Textbox (Expiry Date).
- Textarea (Description).
- Button (Upload Logo).
- Button (Upload Signature).
- Button (Create).
- Button (Back).
- Textbox (Title).
- Textbox (Batch Name).
- Textbox (Instructor Name).
- Textbox (Expiry Date).
- Textarea (Description).
- Button (Upload Logo).
- Button (Upload Signature).
- Button (Create).

### **1.1.1.2 Control Testing**

#### ***1.1.1.2.1 Button (View)***

##### **1.1.1.2.1.1 Guide Lines**

Does the Cursor change?

Do the font size similar to the other attributes in the interface?

Do the font color similar to the other attributes in the interface?

Do the spelling correct?

Do the button size similar to the other button?

Do the expected result is displayed on click?

#### ***1.1.1.2.2 Button (Start)***

##### **1.1.1.2.2.1 Guide Lines**

Does the Cursor change?

Do the font size similar to the other attributes in the interface?

Do the font color similar to the other attributes in the interface?

Do the spelling correct?

Do the button size similar to the other button?

Do the expected result is displayed on click?

#### ***1.1.1.2.3 Button (Single Certificate)***

##### **1.1.1.2.3.1 Guide Lines**

Does the Cursor change?

Do the font size similar to the other attributes in the interface?

Do the font color similar to the other attributes in the interface?

Do the spelling correct?  
 Do the button size similar to the other button?  
 Do the expected result is displayed on click?

#### **1.1.1.2.4 Button (Batch Certificate)**

##### **1.1.1.2.4.1 Guide Lines**

Does the Cursor change?  
 Do the font size similar to the other attributes in the interface?  
 Do the font color similar to the other attributes in the interface?  
 Do the spelling correct?  
 Do the button size similar to the other button?  
 Do the expected result is displayed on click?

#### **1.1.1.2.5 Button (Back)**

##### **1.1.1.2.5.1 Guide Lines**

Does the Cursor change?  
 Does it show a tooltip on hover?  
 Does the spelling correct?  
 Do the button size similar to the other button?  
 Does the expected result is displayed on click?

#### **1.1.1.2.6 Textbox (Title)**

##### **1.1.1.2.6.1 Test Cases (Input Based)**

Do the textbox editable or not?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Editability testing.		Data should be editable.		

Does the textbox allow alpha characters or alphanumeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Alpha characters testing.		Data should be acceptable.		
Alphanumeric characters testing.		Data should be acceptable.		

Does the textbox allow uppercase, lowercase or both?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Uppercase characters testing.		Data should be acceptable.		
Lowercase characters testing.		Data should be acceptable.		
Uppercase and lowercase characters testing.		Data should be acceptable.		

Does the textbox have a Max-Min character limit?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Maximum character limit testing.		Size limit should not be more than 64 characters.		
Minimum character limit testing.		Size limit should not be less than 8 characters.		

Does textbox allow numeric characters only?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Numeric values testing.		Data should be acceptable.		

Does the textbox allow entering “Spaces” in the prefix and suffix of the entered characters in the title?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space in the prefix and suffix.		Data should not be acceptable.		

Does the textbox allow entering “Spaces” in between the characters in the title?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid

Check for space between the characters in the title.		Data should be acceptable.		
--	--	----------------------------	--	--

Do long title from word or notepad are allowed?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Long title testing.		Size limit should not be more than 64 characters.		

Does the textbox accept only spaces as input?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for only spaces as input.		Not allowed.		

Does the textbox allow any special characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters in the title.		Data should be acceptable.		

Does the textbox allow any special characters at the start or end of the title?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters at the start of the title.		Data should not be acceptable.		

Check for any special characters at the end of the title.		Data should not be acceptable.	
---	--	--------------------------------	--

#### 1.1.1.2.6.2 Test cases (Step Based)

Does the textbox allow the user to copy the title?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

#### 1.1.1.2.6.3 Guide Lines

Do the textbox be selected from the Keyboard "tab " Button?

Do the cursor blink when clicking in the textbox?

Do the value visible when typed to the textbox?

Does the textbox's placeholder visible or not?

Does the textbox is null by default?

Does the height and alignment of text boxes are the same throughout the site?

#### 1.1.1.2.7 Textbox (Candidate Name)

##### 1.1.1.2.7.1 Test Cases (Input Based)

Do the textbox editable or not?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Editability testing.		Data should be editable.		

Does the textbox allow alpha characters or alphanumeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Alpha characters testing.		Data should be acceptable.		
Alphanumeric characters testing.		Data should not be acceptable.		

Does the textbox allow uppercase, lowercase or both?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Uppercase characters testing.		Data should be acceptable.		
Lowercase characters testing.		Data should be acceptable.		
Uppercase and lowercase characters testing.		Data should be acceptable.		

Does the textbox have a Max-Min character limit?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Maximum character limit testing.		Size limit should not be more than 64 characters.		
Minimum character limit testing.		Size limit should not be less than 8 characters.		

Does textbox allow numeric characters only?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Numeric values testing.		Data should not be acceptable.		

Does the textbox allow entering “Spaces” in the prefix and suffix of the entered characters in the Candidate Name?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space in the prefix and suffix.		Data should not be acceptable.		

Does the textbox allow entering “Spaces” in between the Candidate Name?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space between Candidate Name.		Data should be acceptable.		

Do long Candidate Name from word or notepad are allowed?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Long Candidate Name.		Size limit should not be more than 320 characters.		

Does the textbox accept only spaces as input?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for only spaces as input.		Not allowed.		

Does the textbox allow any special characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters in the Candidate Name.		Data should not be acceptable.		

Does the textbox allow any special characters at the start or end of the Candidate Name?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid

Check for any special characters at the start of the Candidate Name.		Data should not be acceptable.		
Check for any special characters at the end of the Candidate Name.		Data should not be acceptable.		

#### 1.1.1.2.7.2 Test cases (Step Based)

Does the textbox allow the user to copy the Candidate Name?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

Guide Lines

Do the textbox be selected from the Keyboard "tab " Button?

Do the cursor blink when clicking in the textbox?

Do the value visible when typed to the textbox?

Does the textbox’s placeholder visible or not?

Does the textbox is null by default?

Does the height and alignment of text boxes are the same throughout the site?

#### 1.1.1.2.8 Textbox (Candidate Email)

##### 1.1.1.2.8.1 Test Cases (Input Based)

Do the textbox editable or not?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Editability testing.		Data should be editable.		

Does the textbox allow alpha characters or alphanumeric characters in the username of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Alpha characters testing.		Data should be acceptable.		

Alphanumeric characters testing.		Data should be acceptable.		
----------------------------------	--	----------------------------	--	--

Does the textbox allow in uppercase, lowercase or both in the username of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Uppercase characters testing.		Data should be acceptable.		
Lowercase characters testing.		Data should be acceptable.		
Uppercase and lowercase characters testing.		Data should be acceptable.		

Does the text box have a Max-Min character limit in the username of email and domain name of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Maximum character limit testing in username.		Size limit should not be more than 64 characters.		
Minimum character limit testing in username.		Size limit should not be less than 1 character.		
Maximum character limit testing in domain name.		Size limit should not be more than 255 characters.		
Minimum character limit testing in domain name.		Size limit should not be less than 1 character.		

Does textbox allow numeric characters only in the username of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
----------------	-------	-----------------	---------------	----------------

Numeric values testing.		Data should not be acceptable.		
-------------------------	--	--------------------------------	--	--

Does the textbox allow entering “Spaces” in the prefix and suffix of the entered characters in the email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space in the prefix and suffix.		Data should not be acceptable.		

Does the textbox allow entering “Spaces” in between any part of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space in username.		Data should not be acceptable.		
Check for space in domain name.		Data should not be acceptable.		

Do long emails from word or notepad are allowed?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Long email testing.		Size limit should not be more than 320 characters.		

Does the textbox accept only spaces as input?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for only spaces as input.		Not allowed.		

Does the textbox allow any special characters in the username of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters in username.		Data should be acceptable.		

Does the textbox allow any special characters at the start or end of the username of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters at the start of the username.		Data should not be acceptable.		
Check for any special characters at the end of the username.		Data should not be acceptable.		

#### 1.1.1.2.8.2 Test cases (Step Based)

Does the textbox allow the user to copy email?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

#### 1.1.1.2.8.3 Guide Lines

Do the textbox be selected from the Keyboard "tab " Button?

Do the cursor Blink when clicking in the textbox?

Do the value visible when typed to the textbox?

Does the textbox's placeholder visible or not?

Does the textbox is null by default?

Does the height and alignment of text boxes are the same throughout the site?

#### 1.1.1.2.9 Textbox (Instructor Name).

##### 1.1.1.2.9.1 Test Cases (Input Based)

Do the textbox editable or not?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Editability testing.		Data should be editable.		

Does the textbox allow alpha characters or alphanumeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid

Alpha characters testing.		Data should be acceptable.		
Alphanumeric characters testing.		Data should not be acceptable.		

Does the textbox allow uppercase, lowercase or both?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Uppercase characters testing.		Data should be acceptable.		
Lowercase characters testing.		Data should be acceptable.		
Uppercase and lowercase characters testing.		Data should be acceptable.		

Does the textbox have a Max-Min character limit?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Maximum character limit testing.		Size limit should not be more than 64 characters.		
Minimum character limit testing.		Size limit should not be less than 8 characters.		

Does textbox allow numeric characters only?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Numeric values testing.		Data should not be acceptable.		

Does the textbox allow entering “Spaces” in the prefix and suffix of the entered characters in the Instructor Name?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space in the prefix and suffix.		Data should not be acceptable.		

Does the textbox allow entering “Spaces” in between the Instructor Name?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space between Instructor Name.		Data should be acceptable.		

Do long Instructor Name from word or notepad are allowed?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Long Instructor Name.		Size limit should not be more than 320 characters.		

Does the textbox accept only spaces as input?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for only spaces as input.		Not allowed.		

Does the textbox allow any special characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters		Data should not be acceptable.		

in the Instructor Name.				
-------------------------	--	--	--	--

Does the textbox allow any special characters at the start or end of the Instructor Name?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters at the start of the Instructor Name.		Data should not be acceptable.		
Check for any special characters at the end of the Instructor Name.		Data should not be acceptable.		

#### 1.1.2.9.2 Test cases (Step Based)

Does the textbox allow the user to copy the Instructor Name?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

#### 1.1.2.9.3 Guide Lines

Do the textbox be selected from the Keyboard "tab " Button?

Do the cursor blink when clicking in the textbox?

Do the value visible when typed to the textbox?

Does the textbox’s placeholder visible or not?

Does the textbox is null by default?

Does the height and alignment of text boxes are the same throughout the site?

#### 1.1.2.10 *Textbox (Expiry Date)*

##### 1.1.2.10.1 Test Cases (Input Based)

Does it allow us to select a date less than the current date?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Lesser date testing.		Data should not be acceptable and		

		should prompt an error.		
--	--	-------------------------	--	--

Does it allow the user to enter a date?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Editability testing.		Data should be editable.		

Does the textbox allow alpha characters or alphanumeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Alpha characters testing.		Data should not be acceptable.		
Alphanumeric characters testing.		Data should not be acceptable.		

Does textbox allow numeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Numeric character testing.		Data should be acceptable.		

Does the textbox allow hyphen (-) and slash (/) special characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for hyphen (-) in the date field.		Data should be acceptable.		
Check for slash (/) in the date field.		Data should be acceptable.		
Check for any special character other than hyphen (-) and slash (/) in the date field.		Data should not be acceptable.		

### **1.1.2.10.2 Guideline**

- Does the calendar widget open when clicking on the date field?  
 Do the width and height of the calendar widget as per requirement?  
 Does the calendar display current month and current date is highlighted when clicking on the date field?  
 Does the header of the calendar widget display current month and year?  
 Do the users switch from one month to another using the next and previous button?  
 Do the user able to select and edit the date or not?  
 Do the date field in the format of dd/mm/yy or mm/dd/yy or yyyy?

### **1.1.2.11 *Textarea (Description)***

#### **1.1.2.11.1 Test Cases (Input Based)**

Do the textarea editable or not?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Editability testing.		Data should be editable.		

Does the textarea allow alpha characters or alphanumeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Alpha characters testing.		Data should be acceptable.		
Alphanumeric characters testing.		Data should be acceptable.		

Does the textarea allow uppercase, lowercase or both?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Uppercase characters testing.		Data should be acceptable.		
Lowercase characters testing.		Data should be acceptable.		
Uppercase and lowercase characters testing.		Data should be acceptable.		

Does the textarea have a Max-Min character limit?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Maximum character limit testing.		Size limit should not be more than 64 characters.		
Minimum character limit testing.		Size limit should not be less than 8 characters.		

Does textarea allow numeric characters only?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Numeric values testing.		Data should be acceptable.		

Does the textarea allow entering “Spaces” in the prefix and suffix of the entered characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space in the prefix and suffix.		Data should not be acceptable.		

Does the textarea allow entering “Spaces” in between the characters in the description?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space between the characters in the descriptions.		Data should be acceptable.		

Do long description from word or notepad allowed?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Long verification code testing.		Size limit should not be more than 320 characters.		

Does the textarea accept only spaces as input?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for only spaces as input.		Not allowed.		

Does the textarea allow any special characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters in description.		Data should be acceptable.		

Does the textarea allow any special characters at the start or end of the description?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters at the start of the description.		Data should be acceptable.		
Check for any special characters at the end of the description. .		Data should be acceptable.		

### 1.1.2.11.2 Test cases (Step Based)

Does the textarea allow the user to copy the description?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

### 1.1.2.11.3 Guide Lines

Do the textarea be selected from the Keyboard "tab" Button?

Do the cursor blink when clicking in the textarea ?

Do the value visible when typed to the textarea ?

Does the textarea's placeholder visible or not?

Does the textarea is null by default?

Does the height and alignment of the textarea are the same throughout the site?

### 1.1.2.12 *Button (Upload Logo)*

**1.1.2.12.1 Test Case (Step Based)**

Does it restrict users to add multiple images?

Goto:

Step 1: Click on “Upload Logo”.

Step 2: Select image then click on “Open”.

Expected Output: Should display image on certificate.

Actual Output:

Does it restrict users to add images of different extensions other than png?

Goto:

Step 1: Click on “Upload Logo”.

Step 2: Select an image other than PNG then click on “Open”.

Expected Output: Should display error message.

Actual Output:

Does there exist a size limit of image?

Go to:

Step 1: Click on “Upload Logo”.

Step 2: Select a large size image then click on “Open”.

Expected Output: Should display error message.

Actual Output:

Does it prompt validation for files other than images?

Go to:

Step 1: Click on “Upload Logo”.

Step 2: Select a file other than PNG then click on “Open”.

Expected Output: Should display error message.

Actual Output:

Does its prompt validation for images whose name contain special characters?

Go to:

Step 1: Click on “Upload Logo”.

Step 2: Select an image whose name contains a special character then click on “Open”.

Expected Output: Should display error message.

Actual Output:

**1.1.2.12.2 Guide Lines**

Does the quality of the image remain the same after upload?

Do the image colors remain the same before and after upload?

Does the Cursor change?

Do the font size similar to the other attributes in the interface?

Do the font color similar to the other attributes in the interface?

Do the spelling correct?

Do the button size similar to the other button?

**1.1.2.13 Button (Upload Signature)****1.1.2.13.1 Test Case (Step Based)**

Does it restrict users to add multiple images?

Goto:

Step 1: Click on “Upload Signature”.

Step 2: Select image then click on “Open”.

Expected Output: Should display image on certificate.

Actual Output:

Does it restrict users to add images of different extensions other than png?

Goto:

Step 1: Click on “Upload Signature”.

Step 2: Select an image other than PNG then click on “Open”.

Expected Output: Should display error message.

Actual Output:

Does there exist a size limit of image?

Go to:

Step 1: Click on “Upload Signature”.

Step 2: Select a large size image then click on “Open”.

Expected Output: Should display error message.

Actual Output:

Does it prompt validation for files other than images?

Go to:

Step 1: Click on “Upload Signature”.

Step 2: Select a file other than PNG then click on “Open”.

Expected Output: Should display error message.

Actual Output:

Does its prompt validation for images whose name contain special characters?

Go to:

Step 1: Click on “Upload Signature”.

Step 2: Select an image whose name contains a special character then click on “Open”.

Expected Output: Should display error message.

Actual Output:

#### Guide Lines

Does the quality of the image remain the same after upload?

Do the image colors remain the same before and after upload?

Does the Cursor change?

Do the font size similar to the other attributes in the interface?

Do the font color similar to the other attributes in the interface?

Do the spelling correct?

Do the button size similar to the other button?

### **1.1.1.2.14    *Button (Create)***

#### **1.1.1.2.14.1 Test Case (Step Based)**

Does it prompt an error if any of the fields from is invalid or empty?

Goto:

Step 1: Click on “Create”.

Expected Output: Should prompt error message.

Actual Output:

Does it prompt an error if all the fields are valid and filled?

Goto:

Step 1: Click on “Create”.

Expected Output: Should not prompt error message.

Actual Output:

Guide Lines

Does the Cursor change?

Do the font size similar to the other attributes in the interface?

Do the font color similar to the other attributes in the interface?

Do the spelling correct?

Do the button size similar to the other button?

### **1.1.2.15    *Button (Back)***

#### **1.1.2.15.1 Guide Lines**

Does the Cursor change?

Does it show a tooltip on hover?

Do the spelling correct?

Do the button size similar to the other button?

Do the expected result is displayed on click?

### **1.1.2.16    *Textbox (Title)***

#### **1.1.2.16.1 Test Cases (Input Based)**

Do the textbox editable or not?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Editability testing.		Data should be editable.		

Does the textbox allow alpha characters or alphanumeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Alpha characters testing.		Data should be acceptable.		
Alphanumeric characters testing.		Data should be acceptable.		

Does the textbox allow uppercase, lowercase or both?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Uppercase characters testing.		Data should be acceptable.		
Lowercase characters testing.		Data should be acceptable.		
Uppercase and lowercase characters testing.		Data should be acceptable.		

Does the textbox have a Max-Min character limit?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Maximum character limit testing.		Size limit should not be more than 64 characters.		
Minimum character limit testing.		Size limit should not be less than 8 characters.		

Does textbox allow numeric characters only?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Numeric values testing.		Data should be acceptable.		

Does the textbox allow entering “Spaces” in the prefix and suffix of the entered characters in the title?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space in the prefix and suffix.		Data should not be acceptable.		

Does the textbox allow entering “Spaces” in between the characters in the title?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid

Check for space between the characters in the title.	Data should be acceptable.		
--	----------------------------	--	--

Do long title from word or notepad are allowed?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Long title testing.		Size limit should not be more than 320 characters.		

Does the textbox accept only spaces as input?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for only spaces as input.		Not allowed.		

Does the textbox allow any special characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters in the title.		Data should be acceptable.		

Does the textbox allow any special characters at the start or end of the title?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters		Data should not be acceptable.		

at the start of the title.				
Check for any special characters at the end of the title. .		Data should not be acceptable.		

#### 1.1.1.2.16.2 Test cases (Step Based)

Does the textbox allow the user to copy the title?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

#### 1.1.1.2.16.3 Guide Lines

Do the textbox be selected from the Keyboard "tab " Button?

Do the cursor blink when clicking in the textbox?

Do the value visible when typed to the textbox?

Does the textbox's placeholder visible or not?

Does the textbox is null by default?

Does the height and alignment of text boxes are the same throughout the site?

#### 1.1.1.2.17 *Textbox (Batch Name)*

##### 1.1.1.2.17.1 Test Cases (Input Based)

Do the textbox editable or not?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Editability testing.		Data should be editable.		

Does the textbox allow alpha characters or alphanumeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Alpha characters testing.		Data should be acceptable.		

Alphanumeric characters testing.		Data should be acceptable.		
----------------------------------	--	----------------------------	--	--

Does the textbox allow uppercase, lowercase or both?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Uppercase characters testing.		Data should be acceptable.		
Lowercase characters testing.		Data should be acceptable.		
Uppercase and lowercase characters testing.		Data should be acceptable.		

Does the textbox have a Max-Min character limit?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Maximum character limit testing.		Size limit should not be more than 64 characters.		
Minimum character limit testing.		Size limit should not be less than 8 characters.		

Does textbox allow numeric characters only?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Numeric values testing.		Data should be acceptable.		

Does the textbox allow entering “Spaces” in the prefix and suffix of the entered characters in the Batch Name?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
----------------	-------	-----------------	---------------	----------------

Check for space in the prefix and suffix.		Data should not be acceptable.		
---	--	--------------------------------	--	--

Does the textbox allow entering “Spaces” in between the characters in the Batch Name?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space between the characters in the Batch Name.		Data should be acceptable.		

Do long Batch Name from word or notepad are allowed?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Long title testing.		Size limit should not be more than 320 characters.		

Does the textbox accept only spaces as input?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for only spaces as input.		Not allowed.		

Does the textbox allow any special characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters in the Batch Name.		Data should not be acceptable.		

Does the textbox allow any special characters at the start or end of the title?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters at the start of the Batch Name.		Data should not be acceptable.		
Check for any special characters at the end of the Batch Name.		Data should not be acceptable.		

#### 1.1.2.17.2 Test cases (Step Based)

Does the textbox allow the user to copy the Batch Name?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

#### 1.1.2.17.3 Guide Lines

Do the textbox be selected from the Keyboard "tab " Button?

Do the cursor blink when clicking in the textbox?

Do the value visible when typed to the textbox?

Does the textbox's placeholder visible or not?

Does the textbox is null by default?

Does the height and alignment of text boxes are the same throughout the site?

#### 1.1.2.18 Textbox (Instructor Name)

##### 1.1.2.18.1 Test Cases (Input Based)

Do the textbox editable or not?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Editability testing.		Data should be editable.		

Does the textbox allow alpha characters or alphanumeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid

Alpha characters testing.		Data should be acceptable.		
Alphanumeric characters testing.		Data should not be acceptable.		

Does the textbox allow uppercase, lowercase or both?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Uppercase characters testing.		Data should be acceptable.		
Lowercase characters testing.		Data should be acceptable.		
Uppercase and lowercase characters testing.		Data should be acceptable.		

Does the textbox have a Max-Min character limit?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Maximum character limit testing.		Size limit should not be more than 64 characters.		
Minimum character limit testing.		Size limit should not be less than 8 characters.		

Does textbox allow numeric characters only?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Numeric values testing.		Data should not be acceptable.		

Does the textbox allow entering “Spaces” in the prefix and suffix of the entered characters in the Instructor Name?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space in the prefix and suffix.		Data should not be acceptable.		

Does the textbox allow entering “Spaces” in between the Instructor Name?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space between Instructor Name.		Data should be acceptable.		

Do long Instructor Name from word or notepad are allowed?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Long Instructor Name.		Size limit should not be more than 320 characters.		

Does the textbox accept only spaces as input?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for only spaces as input.		Not allowed.		

Does the textbox allow any special characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters in the Instructor Name.		Data should not be acceptable.		

Does the textbox allow any special characters at the start or end of the Instructor Name?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters at the start of the Instructor Name.		Data should not be acceptable.		

Check for any special characters at the end of the Instructor Name.		Data should not be acceptable.		
---	--	--------------------------------	--	--

#### 1.1.1.2.18.2 Test cases (Step Based)

Does the textbox allow the user to copy Instructor Name?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

#### 1.1.1.2.18.3 Guide Lines

Do the textbox be selected from the Keyboard "tab " Button?

Do the cursor blink when clicking in the textbox?

Do the value visible when typed to the textbox?

Does the textbox's placeholder visible or not?

Does the textbox is null by default?

Does the height and alignment of text boxes are the same throughout the site?

### 1.1.1.2.19 *Textbox (Expiry Date)*

#### 1.1.1.2.19.1 Test Cases (Input Based)

Does it allow us to select a date less than the current date?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Lesser date testing.		Data should not be acceptable and should prompt an error.		

Does it allow the user to enter a date?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Editability testing.		Data should be editable.		

Does the textbox allow alpha characters or alphanumeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid

Alpha characters testing.		Data should not be acceptable.		
Alphanumeric characters testing.		Data should not be acceptable.		

Does textbox allow numeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Numeric character testing.		Data should be acceptable.		

Does the textbox allow hyphen (-) and slash (/) special characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for hyphen (-) in the date field.		Data should be acceptable.		
Check for slash (/) in the date field.		Data should be acceptable.		
Check for any special character other than hyphen (-) and slash (/) in the date field.		Data should not be acceptable.		

### 1.1.2.19.2 Guideline

Does the calendar widget open when clicking on the date field?

Do the width and height of the calendar widget as per requirement?

Does the calendar display current month and current date is highlighted when clicking on the date field?

Does the header of the calendar widget display current month and year?

Do the users switch from one month to another using the next and previous button?

Do the user able to select and edit the date or not?

Do the date field in the format of dd/mm/yy or mm/dd/yy or yyyy?

### 1.1.2.20 *Textarea (Description)*

#### 1.1.2.20.1 Test Cases (Input Based)

Do the textarea editable or not?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Editability testing.		Data should be editable.		

Does the textarea allow alpha characters or alphanumeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Alpha characters testing.		Data should be acceptable.		
Alphanumeric characters testing.		Data should be acceptable.		

Does the textarea allow uppercase, lowercase or both?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Uppercase characters testing.		Data should be acceptable.		
Lowercase characters testing.		Data should be acceptable.		
Uppercase and lowercase characters testing.		Data should be acceptable.		

Does the textarea have a Max-Min character limit?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Maximum character limit testing.		Size limit should not be more than 64 characters.		
Minimum character limit testing.		Size limit should not be less than 8 characters.		

Does textarea allow numeric characters only?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Numeric values testing.		Data should be acceptable.		

Does the textarea allow entering “Spaces” in the prefix and suffix of the entered characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space in the prefix and suffix.		Data should not be acceptable.		

Does the textarea allow entering “Spaces” in between the characters in the description?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space between the characters in the descriptions.		Data should be acceptable.		

Do long description from word or notepad allowed?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Long verification code testing.		Size limit should not be more than 320 characters.		

Does the textarea accept only spaces as input?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid

Check for only spaces as input.		Not allowed.		
---------------------------------	--	--------------	--	--

Does the textarea allow any special characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters in description.		Data should be acceptable.		

Does the textarea allow any special characters at the start or end of the description?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters at the start of the description.		Data should be acceptable.		
Check for any special characters at the end of the description. .		Data should be acceptable.		

Test cases (Step Based)

Does the textarea allow the user to copy description?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

Guide Lines

Do the textarea be selected from the Keyboard "tab " Button?

Do the cursor blink when clicking in the textarea ?

Do the value visible when typed to the textarea ?

Does the textarea’s placeholder visible or not?

Does the textarea is null by default?

Does the height and alignment of the textarea are the same throughout the site?

Button (Upload Logo).

Test Case (Step Based)

Does it restrict users to add multiple images?

Goto:

Step 1: Click on “Upload Logo”.

Step 2: Select image then click on “Open”.

Expected Output: Should display image on certificate.

Actual Output:

Does it restrict users to add images of different extensions other than png?

Goto:

Step 1: Click on “Upload Logo”.

Step 2: Select an image other than PNG then click on “Open”.

Expected Output: Should display error message.

Actual Output:

Does there exist a size limit of image?

Go to:

Step 1: Click on “Upload Logo”.

Step 2: Select a large size image then click on “Open”.

Expected Output: Should display error message.

Actual Output:

Does it prompt validation for files other than images?

Go to:

Step 1: Click on “Upload Logo”.

Step 2: Select a file other than PNG then click on “Open”.

Expected Output: Should display error message.

Actual Output:

Does its prompt validation for images whose name contain special characters?

Go to:

Step 1: Click on “Upload Logo”.

Step 2: Select an image whose name contains a special character then click on “Open”.

Expected Output: Should display error message.

Actual Output:

#### Guide Lines

Does the quality of the image remain the same after upload?

Do the image colors remain the same before and after upload?

Does the Cursor change?

Do the font size similar to the other attributes in the interface?

Do the font color similar to the other attributes in the interface?

Do the spelling correct?

Do the button size similar to the other button?

Button (Upload Signature).

Test Case (Step Based)

Does it restrict users to add multiple images?

Goto:

Step 1: Click on “Upload Signature”.

Step 2: Select image then click on “Open”.

Expected Output: Should display image on certificate.

Actual Output:

Does it restrict users to add images of different extensions other than png?

Goto:

Step 1: Click on “Upload Signature”.

Step 2: Select an image other than PNG then click on “Open”.

Expected Output: Should display error message.

Actual Output:

Does there exist a size limit of image?

Go to:

Step 1: Click on “Upload Signature”.

Step 2: Select a large size image then click on “Open”.

Expected Output: Should display error message.

Actual Output:

Does it prompt validation for files other than images?

Go to:

Step 1: Click on “Upload Signature”.

Step 2: Select a file other than PNG then click on “Open”.

Expected Output: Should display error message.

Actual Output:

Does its prompt validation for images whose name contain special characters?

Go to:

Step 1: Click on “Upload Signature”.

Step 2: Select an image whose name contains a special character then click on “Open”.

Expected Output: Should display error message.

Actual Output:

Guide Lines

Does the quality of the image remain the same after upload?

Do the image colors remain the same before and after upload?

Does the Cursor change?

Do the font size similar to the other attributes in the interface?

Do the font color similar to the other attributes in the interface?

Do the spelling correct?

Do the button size similar to the other button?

Button (Create).

Test Case (Step Based)

Does it prompt an error if any of the fields from is invalid or empty?

Goto:

Step 1: Click on “Create”.

Expected Output: Should prompt error message.

Actual Output:

Does it prompt an error if all the fields are valid and filled?

Goto:

Step 1: Click on “Create”.

Expected Output: Should not prompt error message.

Actual Output:

Guide Lines

Does the Cursor change?

Do the font size similar to the other attributes in the interface?

Do the font color similar to the other attributes in the interface?

Do the spelling correct?

Do the button size similar to the other button?

## Certificate Interface

The screenshot displays two windows of a web application titled "Certificate Interface".

**Top Window (Certificates List):**

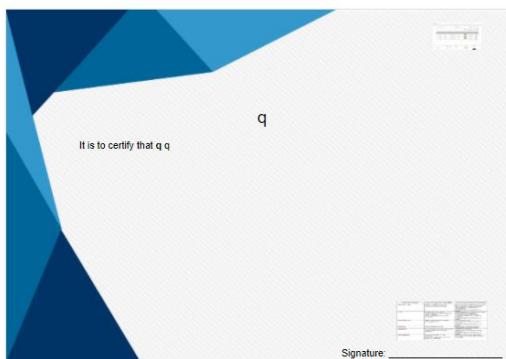

- Header:** Single Certificates | Batch Certificates | CERTIFICATES
- Table Headers:** Issue Date, Expiry Date, Name, Title, Issuedby, Actions, Publish.
- Data:**

Issue Date	Expiry Date	Name	Title	Issuedby	Actions	Publish	
12/5/2020, 11:39:55 PM	Life time	q	Activity Diagram	ismail			
12/5/2020, 10:13:42 PM	12/31/2020	hello	Activity Diagram	Hassan			
12/5/2020, 10:12:26 PM	Life time	alsjdlkas@mail.com	Hello	Hassan			
12/5/2020, 10:10:32 PM	Life time	hasadsia	AWS	Hassan			
12/3/2020, 12:14:18 AM	Life time	Aamir	MERN Developer	Hassan			
- Pagination:** < < 1 2 > >>

**Bottom Window (View Certificate):**

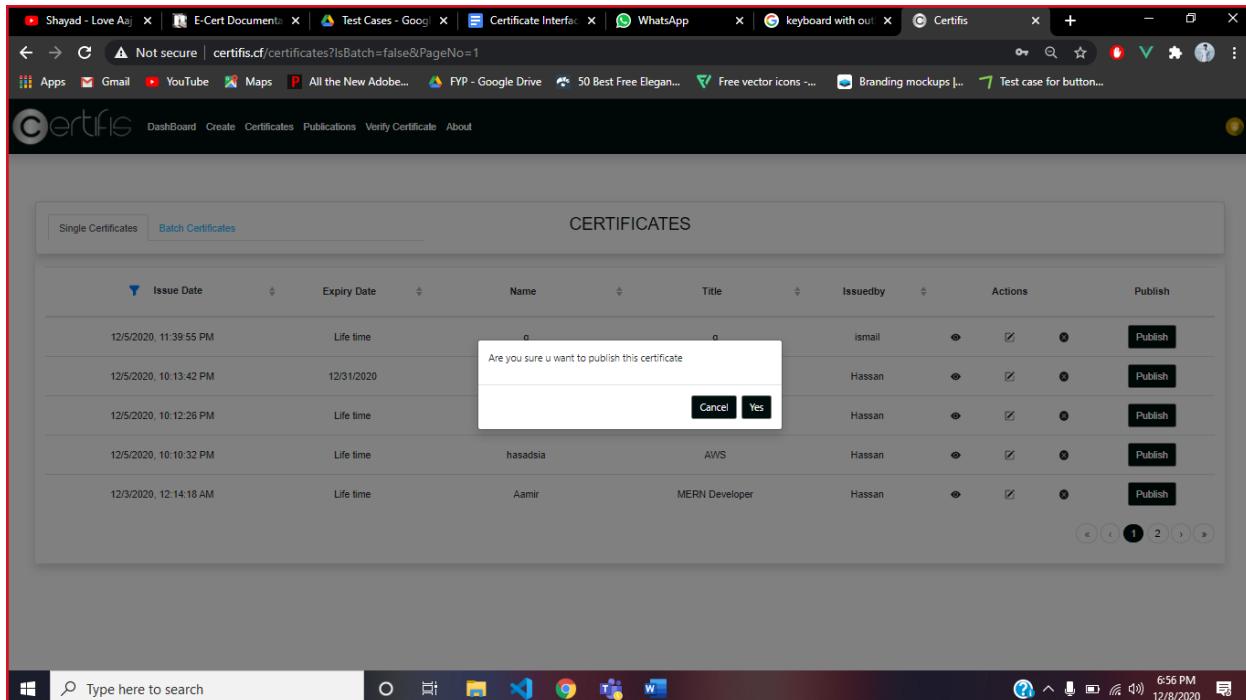

- Header:** View Certificate
- Content:**

It is to certify that q q

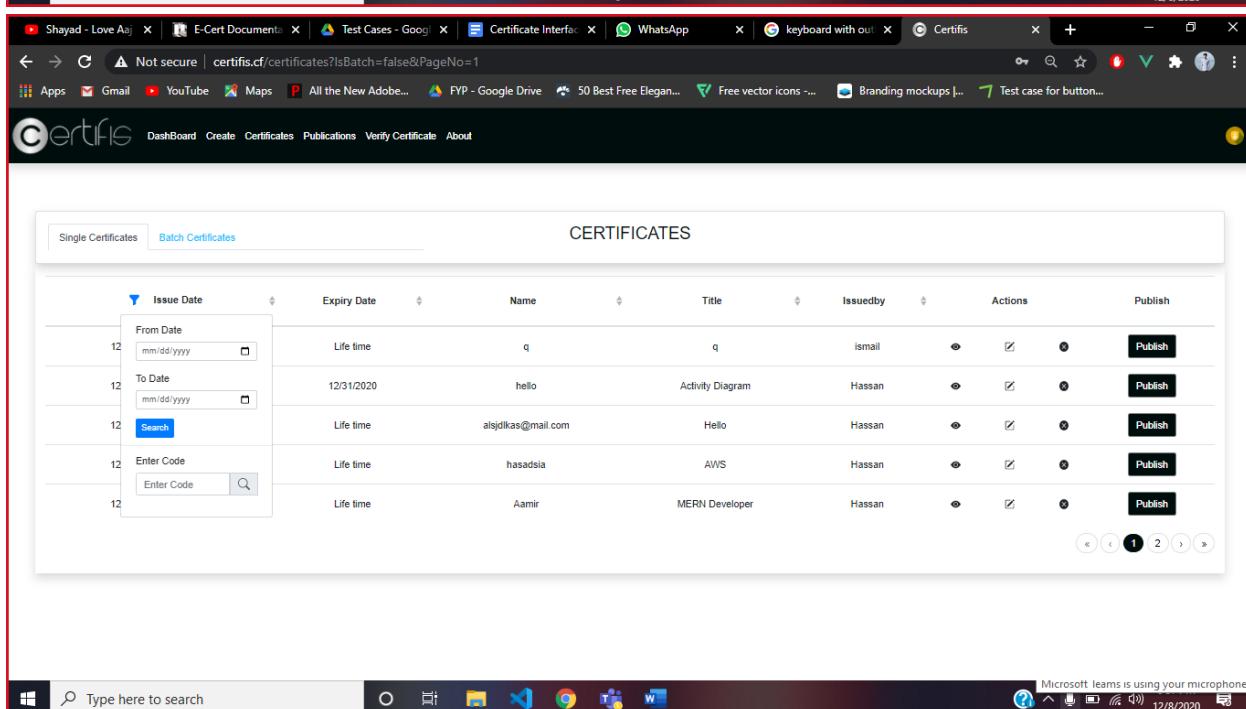

Signature: \_\_\_\_\_

The image shows two screenshots of a web application named 'Certifis'.  
The top screenshot displays the 'Edit Certificate' page. It features a large central area for certificate content with placeholder text 'It is to certify that q q' and a small image of a certificate. To the right is a form with fields for 'Title', 'Candidate Name', 'Candidate Email' (set to 'iyaqoob62@gmail.com'), 'Instructor Name', 'Expiry Date' (set to 'mm/dd/yyyy'), and 'Description'. Below these are buttons for 'UPLOAD LOGO', 'UPLOAD SIGNATURE', and 'Update'.  
The bottom screenshot shows the 'CERTIFICATES' page. It lists several certificates with columns for 'Issue Date', 'Expiry Date', 'Name', 'Title', 'Issuedby', 'Actions', and 'Publish'. A modal window is open over the list, asking 'Are You sure you want to delete this certificate?' with 'Cancel' and 'Yes' buttons. The 'Yes' button is highlighted in blue.

The screenshot shows a list of certificates in a table. A modal dialog box is overlaid on the table, asking "Are you sure u want to publish this certificate?" with "Cancel" and "Yes" buttons. The table columns include Issue Date, Expiry Date, Name, Title, Issuedby, Actions, and Publish.

Issue Date	Expiry Date	Name	Title	Issuedby	Actions	Publish
12/5/2020, 11:39:55 PM	Life time	ismail		Hassan	<input checked="" type="checkbox"/> <input type="checkbox"/>	<button>Publish</button>
12/5/2020, 10:13:42 PM	12/31/2020			Hassan	<input checked="" type="checkbox"/> <input type="checkbox"/>	<button>Publish</button>
12/5/2020, 10:12:26 PM	Life time			Hassan	<input checked="" type="checkbox"/> <input type="checkbox"/>	<button>Publish</button>
12/5/2020, 10:10:32 PM	Life time	hasadsia	AWS	Hassan	<input checked="" type="checkbox"/> <input type="checkbox"/>	<button>Publish</button>
12/3/2020, 12:14:18 AM	Life time	Aamir	MERN Developer	Hassan	<input checked="" type="checkbox"/> <input type="checkbox"/>	<button>Publish</button>

The screenshot shows the same list of certificates, but the search filters on the left side are highlighted. The filters include "From Date" (mm/dd/yyyy), "To Date" (mm/dd/yyyy), and "Enter Code". The "Batch Certificates" tab is selected.

The image displays two screenshots of the Certifis web application interface.

**Screenshot 1: Dashboard - Certificates**

This screenshot shows a table titled "CERTIFICATES" listing four entries:

Created Date	Expiry Date	Batch Name	Title	Created By	Actions	Publish
12/5/2020, 11:40:36 PM	Life time	q	q	ismail	<span>View</span> <span>Edit</span> <span>Delete</span>	<span>Publish</span>
12/5/2020, 10:11:34 PM	Life time	AWS Certificates	AWS	Hassan	<span>View</span> <span>Edit</span> <span>Delete</span>	<span>Publish</span>
11/28/2020, 4:55:32 PM	11/18/2020	s	s	ismail	<span>View</span> <span>Edit</span> <span>Delete</span>	<span>Publish</span>
11/28/2020, 4:27:18 PM	Life time	Blockchain CERT	Blockchain	Hassan	<span>View</span> <span>Edit</span> <span>Delete</span>	<span>Publish</span>

**Screenshot 2: View Batch**

This screenshot shows a detailed view of a batch certificate titled "View Batch". The certificate contains the following text:

It is to certify that qqq

At the bottom right, there is a placeholder for a signature:

Signature: \_\_\_\_\_

The image displays two screenshots of a web-based e-certification system named Certifis.

**Screenshot 1: Batch Certificates**

This screenshot shows a list of "BATCH CERTIFICATES". The table has columns for Issue Date, Candidate Name, Candidate Email, Issued By, and Actions. All entries show the same details: Issue Date: 12/8/2020, Candidate Name: null, Candidate Email: null, Issued By: ismail. The Actions column contains three icons: a pencil, a magnifying glass, and a trash can.

Issue Date	Candidate Name	Candidate Email	Issued By	Actions
12/8/2020, 4:39:18 PM	null	null	ismail	[Edit, View, Delete]
12/8/2020, 4:39:13 PM	null	null	ismail	[Edit, View, Delete]
12/8/2020, 4:39:05 PM	null	null	ismail	[Edit, View, Delete]
12/8/2020, 4:38:59 PM	null	null	ismail	[Edit, View, Delete]
12/8/2020, 4:38:54 PM	null	null	ismail	[Edit, View, Delete]

**Screenshot 2: View Batch Certificate**

This screenshot shows a "View Batch Certificate" page. It displays a large blue and white geometric graphic on the left. In the center, it says "It is to certify that null qqq". At the bottom right, there is a small image of a certificate and a signature line with the placeholder "Signature: \_\_\_\_\_".

BATCH CERTIFICATES

Issue Date	Candidate Name	Actions
12/8/2020, 4:39:18 PM	null	
12/8/2020, 4:39:13 PM	null	
12/8/2020, 4:39:05 PM	null	
12/8/2020, 4:38:59 PM	null	
12/8/2020, 4:38:54 PM	null	

BATCH CERTIFICATES

Issue Date	Candidate Name	Actions
12/8/2020, 4:39:18 PM	null	
12/8/2020, 4:39:13 PM	null	
12/8/2020, 4:39:05 PM	null	
12/8/2020, 4:38:59 PM	null	
12/8/2020, 4:38:54 PM	null

Created Date: 12/5/2020      Created By: ismail

submit

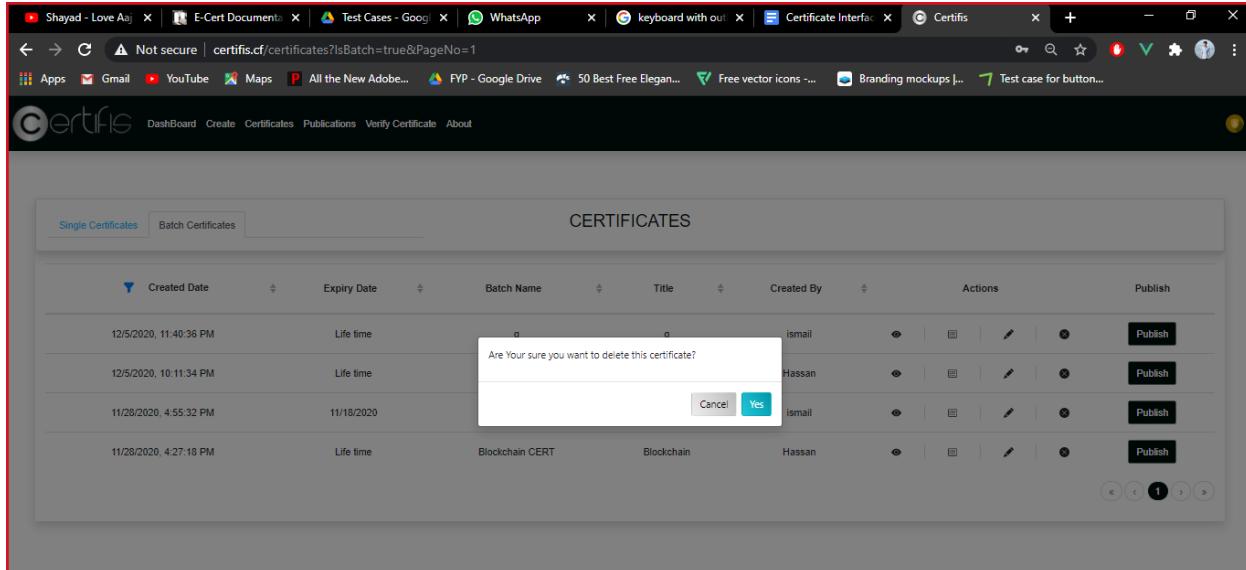

Action

Name Column  
Email Column  
Spread Sheet  
Upload

The screenshot shows a web browser window for the Certifis platform. The main page displays a table titled "BATCH CERTIFICATES" with columns for Index, Name, and Actions. A modal dialog box is centered over the table, asking "Are you sure you want to close this window?" with "Cancel" and "Yes" buttons. The browser's address bar shows a URL starting with "certifis.cf/BatchCerts/5fcbd424052e6039accc5c1e?PageNo=1". The taskbar at the bottom indicates the date as 12/8/2020 and the time as 7:02 PM.

  

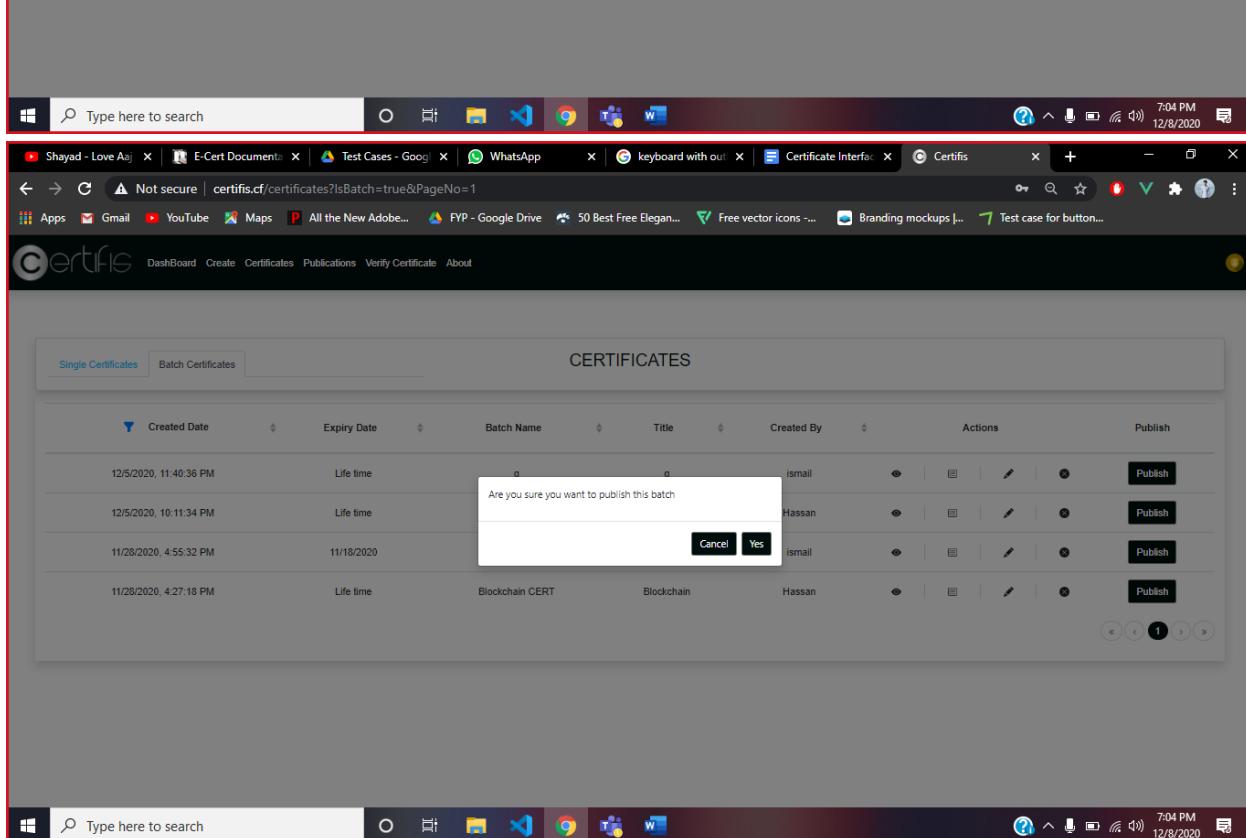

The screenshot shows the "Edit Batch" interface. On the left, there is a preview area with a blue and white geometric background and the text "It is to certify that qqq". On the right, there is a form titled "BATCH INFORMATION" with fields for Title (q), Batch Name (q), Instructor Name (q), Expiry Date (mm/dd/yyyy), and Description (qqq). There are also buttons for UPLOAD LOGO, UPLOAD SIGNATURE, and Save Changes. The browser's address bar shows a URL starting with "certifis.cf/edit/5fcbd424052e6039accc5c1e/true". The taskbar at the bottom indicates the date as 12/8/2020 and the time as 7:04 PM.

The screenshot shows a list of certificates in a table. A modal dialog box is open over the third row, asking "Are you sure you want to delete this certificate?". The dialog has two buttons: "Cancel" and "Yes".

Created Date	Expiry Date	Batch Name	Title	Created By	Actions	Publish
12/5/2020, 11:40:36 PM	Life time			ismail		
12/5/2020, 10:11:34 PM	Life time			Hassan		
11/28/2020, 4:55:32 PM	11/18/2020	Blockchain CERT	Blockchain	ismail		
11/28/2020, 4:27:18 PM	Life time			Hassan		

The screenshot shows the same table of certificates. A modal dialog box is open over the third row, asking "Are you sure you want to publish this batch". The dialog has two buttons: "Cancel" and "Yes".

Created Date	Expiry Date	Batch Name	Title	Created By	Actions	Publish
12/5/2020, 11:40:36 PM	Life time			ismail		
12/5/2020, 10:11:34 PM	Life time			Hassan		
11/28/2020, 4:55:32 PM	11/18/2020	Blockchain CERT	Blockchain	ismail		
11/28/2020, 4:27:18 PM	Life time			Hassan

**Textbox (Title).**1.1.1.12 **Test Cases (Input Based)**

Do the textbox editable or not?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid

Editability testing.		Data should be editable.		
----------------------	--	--------------------------	--	--

Does the textbox allow alpha characters or alphanumeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Alpha characters testing.		Data should be acceptable.		
Alphanumeric characters testing.		Data should be acceptable.		

Does the textbox allow uppercase, lowercase or both?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Uppercase characters testing.		Data should be acceptable.		
Lowercase characters testing.		Data should be acceptable.		

Uppercase and lowercase characters testing.		Data should be acceptable.		
---	--	----------------------------	--	--

Does the textbox have a Max-Min character limit?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Maximum character limit testing.		Size limit should not be more than 64 characters.		
Minimum character limit testing.		Size limit should not be less than 8 characters.		

4. Does textbox allow numeric characters only?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Numeric values testing.		Data should be acceptable.		

Does the textbox allow entering “Spaces” in the prefix and suffix of the entered characters in the title?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Check for space in the prefix and suffix.		Data should not be acceptable.		

Does the textbox allow entering “Spaces” in between the characters in the title?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Check for space between the characters in the title.		Data should be acceptable.		

Do long title from word or notepad are allowed?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>

Long title testing.		Size limit should not be more than 320 characters.		
---------------------	--	--	--	--

Does the textbox accept only spaces as input?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for only spaces as input.		Not allowed.		

Does the textbox allow any special characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters in the title.		Data should be acceptable.		

Does the textbox allow any special characters at the start or end of the title?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters at the start of the title.		Data should not be acceptable.		
Check for any special characters at the end of the title. .		Data should not be acceptable.		

**1.1.1.13 Test cases (Step Based)**

Does the textbox allow the user to copy the title?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

**1.1.1.14 Guide Lines**

Do the textbox be selected from the Keyboard "tab " Button?

Do the cursor blink when clicking in the textbox?

Check for any special		Data should not be acceptable.		

characters in the Candidate Name.			
-----------------------------------	--	--	--

Does the textbox allow any special characters at the start or end of the Candidate Name?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters at the start of the Candidate Name.		Data should not be acceptable.		
Check for any special characters at the end of the Candidate Name.		Data should not be acceptable.		

#### 1.1.1.16 Test cases (Step Based)

Does the textbox allow the user to copy the Candidate Name?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

### 1.1.1.17 Guide Lines

Do the textbox be selected from the Keyboard "tab " Button?

Do the cursor blink when clicking in the textbox?

Do the value visible when typed to the textbox?

Does the textbox's placeholder visible or not?

Does the textbox contain value by default?

Does the height and alignment of text boxes are the same throughout the site?

#### **Textbox (Candidate Email).**

### 1.1.1.18 Test Cases (Input Based)

1. Do the textbox editable or not?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Editability testing.		Data should be editable.		

Does the textbox allow alpha characters or alphanumeric characters in the username of email?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Alpha characters testing.		Data should be acceptable.		

Alphanumeric characters testing.		Data should be acceptable.		
----------------------------------	--	----------------------------	--	--

2. Does the textbox allow in uppercase, lowercase or both in the username of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Uppercase characters testing.		Data should be acceptable.		
Lowercase characters testing.		Data should be acceptable.		
Uppercase and lowercase characters testing.		Data should be acceptable.		

3. Does the text box have a Max-Min character limit in the username of email and domain name of email?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Maximum character limit testing in username.		Size limit should not be more than 64 characters.		
Minimum character limit testing in username.		Size limit should not be less than 1 character.		
Maximum character limit testing in domain name.		Size limit should not be more than 255 characters.		
Minimum character limit testing in domain name.		Size limit should not be less than 1 character.		

4. Does textbox allow numeric characters only in the username of email?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>

Numeric values testing.		Data should not be acceptable.	
-------------------------	--	--------------------------------	--

5. Does the textbox allow entering “Spaces” in the prefix and suffix of the entered characters in the email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space in the prefix and suffix.		Data should not be acceptable.		

Does the textbox allow entering “Spaces” in between any part of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space in username.		Data should not be acceptable.		
Check for space in domain name.		Data should not be acceptable.		

6. Do long emails from word or notepad are allowed?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Long email testing.		Size limit should not be more than 320 characters.		

7. Does the textbox accept only spaces as input?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Check for only spaces as input.		Not allowed.		

Does the textbox allow any special characters in the username of email?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>

Check for any special characters in username.		Data should be acceptable.		
---	--	----------------------------	--	--

Does the textbox allow any special characters at the start or end of the username of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters at the start of the username.		Data should not be acceptable.		
Check for any special characters at the end of the username.		Data should not be acceptable.		

#### 1.1.1.19 Test cases (Step Based)

1. Does the textbox allow the user to copy email?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

#### 1.1.1.20 Guide Lines

1. Do the textbox be selected from the Keyboard "tab " Button?
2. Do the cursor Blink when clicking in the textbox?
3. Do the value visible when typed to the textbox?
4. Does the textbox's placeholder visible or not?
5. Does the textbox is contain value by default?
6. Does the height and alignment of text boxes are the same throughout the site?

**Textbox (Instructor Name).**

#### 1.1.1.21 Test Cases (Input Based)

Do the textbox editable or not?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Editability testing.		Data should be editable.		

Does the textbox allow alpha characters or alphanumeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Alpha characters testing.		Data should be acceptable.		

Alphanumeric characters testing.		Data should not be acceptable.		
----------------------------------	--	--------------------------------	--	--

Does the textbox allow uppercase, lowercase or both?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Uppercase characters testing.		Data should be acceptable.		
Lowercase characters testing.		Data should be acceptable.		
Uppercase and lowercase characters testing.		Data should be acceptable.		

Does the textbox have a Max-Min character limit?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
----------------	-------	-----------------	---------------	----------------

Maximum character limit testing.		Size limit should not be more than 64 characters.		
Minimum character limit testing.		Size limit should not be less than 8 characters.		

5. Does textbox allow numeric characters only?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Numeric values testing.		Data should not be acceptable.		

Does the textbox allow entering “Spaces” in the prefix and suffix of the entered characters in the Instructor Name?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Check for space in the prefix and suffix.		Data should not be acceptable.		

Does the textbox allow entering “Spaces” in between the Instructor Name?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Check for space between Instructor Name.		Data should be acceptable.		

Do long Instructor Name from word or notepad are allowed?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Long Instructor Name.		Size limit should not be more than 320 characters.		

Does the textbox accept only spaces as input?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>

Check for only spaces as input.		Not allowed.		
---------------------------------	--	--------------	--	--

Does the textbox allow any special characters?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Check for any special characters in the Instructor Name.		Data should not be acceptable.		

Does the textbox allow any special characters at the start or end of the Instructor Name?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Check for any special characters at the start of the Instructor Name.		Data should not be acceptable.		
Check for any special characters at the end of the Instructor Name.		Data should not be acceptable.		

**1.1.1.22 Test cases (Step Based)**

Does the textbox allow the user to copy the Instructor Name?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

**1.1.1.23 Guide Lines**

Do the textbox be selected from the Keyboard "tab " Button?

Do the cursor blink when clicking in the textbox?

Do the value visible when typed to the textbox?

Does the textbox's placeholder visible or not?

Does the textbox contain value by default?

Does the height and alignment of text boxes are the same throughout the site?

**Textbox (Expiry Date).****1.1.1.24 Test Cases (Input Based):**

Does it allow us to select a date less than the current date?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Lesser date testing.		Data should not be acceptable and should prompt an error.		

Does it allow the user to enter a date?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Editability testing.		Data should be editable.		

Does the textbox allow alpha characters or alphanumeric characters?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Alpha characters testing.		Data should not be acceptable.		
Alphanumeric characters testing.		Data should not be acceptable.		

Does textbox allow numeric characters?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Numeric character testing.		Data should be acceptable.		

Does the textbox allow hyphen (-) and slash (/) special characters?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Check for hyphen (-) in the date field.		Data should be acceptable.		
Check for slash (/) in the date field.		Data should be acceptable.		
Check for any special character other than hyphen (-) and slash (/) in the date field.		Data should not be acceptable.		

#### **Guideline:**

Does the calendar widget open when clicking on the date field?

Do the width and height of the calendar widget as per requirement?

Does the calendar display current month and current date is highlighted when clicking on the date field?

Does the header of the calendar widget display current month and year?

Do the users switch from one month to another using the next and previous button?

Do the user able to select and edit the date or not?

Do the date field in the format of dd/mm/yy or mm/dd/yy or yyyy?

Does it contain value if it was added while creating or in the last update?

#### **Textarea (Description).**

##### **1.1.1.25 Test Cases (Input Based)**

Do the textarea editable or not?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Editability testing.		Data should be editable.		

Does the textarea allow alpha characters or alphanumeric characters?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Alpha characters testing.		Data should be acceptable.		
Alphanumeric characters testing.		Data should be acceptable.		

Does the textarea allow uppercase, lowercase or both?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Uppercase characters testing.		Data should be acceptable.		

Lowercase characters testing.		Data should be acceptable.		
Uppercase and lowercase characters testing.		Data should be acceptable.		

Does the textarea have a Max-Min character limit?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Maximum character limit testing.		Size limit should not be more than 64 characters.		
Minimum character limit testing.		Size limit should not be less than 8 characters.		

4. Does textarea allow numeric characters only?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid

Numeric values testing.		Data should be acceptable.	
-------------------------	--	----------------------------	--

Does the textarea allow entering “Spaces” in the prefix and suffix of the entered characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space in the prefix and suffix.		Data should not be acceptable.		

Does the textarea allow entering “Spaces” in between the characters in the description?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space between the characters in the descriptions.		Data should be acceptable.		

Do long description from word or notepad allowed?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
----------------	-------	-----------------	---------------	----------------

Long verification code testing.		Size limit should not be more than 320 characters.		
---------------------------------	--	--	--	--

Does the textarea accept only spaces as input?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for only spaces as input.		Not allowed.		

Does the textarea allow any special characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters in description.		Data should be acceptable.		

Does the textarea allow any special characters at the start or end of the description?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Check for any special characters at the start of the description.		Data should be acceptable.		
Check for any special characters at the end of the description. .		Data should be acceptable.		

**1.1.1.26 Test cases (Step Based)**

Does the textarea allow the user to copy the description?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

**1.1.1.27 Guide Lines**

Do the textarea be selected from the Keyboard "tab" Button?

Do the cursor blink when clicking in the textarea ?

Do the value visible when typed to the textarea ?

Does the textarea's placeholder visible or not?

Does the textarea contain values by default?

Does the height and alignment of the textarea are the same throughout the site?

**Button (Upload Logo).**

**1.1.1.28 Test Case (Step Based)**

1. Does it restrict users to add multiple images?

Goto:

Step 1: Click on “Upload Logo”.

Step 2: Select image then click on “Open”.

Expected Output: Should display image on certificate.

Actual Output:

2. Does it restrict users to add images of different extensions other than png?

Goto:

Step 1: Click on “Upload Logo”.

Step 2: Select an image other than PNG then click on “Open”.

Expected Output: Should display error message.

Actual Output:

3. Does there exist a size limit of image?

Go to:

Step 1: Click on “Upload Logo”.

Step 2: Select a large size image then click on “Open”.

Expected Output: Should display error message.

Actual Output:

4. Does it prompt validation for files other than images?

Go to:

Step 1: Click on “Upload Logo”.

Step 2: Select a file other than PNG then click on “Open”.

Expected Output: Should display error message.

Actual Output:

5. Does its prompt validation for images whose name contain special characters?

Go to:

Step 1: Click on “Upload Logo”.

Step 2: Select an image whose name contains a special character then click on “Open”.

Expected Output: Should display error message.

Actual Output:

#### 1.1.1.29 Guide Lines

1. Does the quality of the image remain the same after upload?
2. Do the image colors remain the same before and after upload?
3. Does the Cursor change?
4. Do the font size similar to the other attributes in the interface?
5. Do the font color similar to the other attributes in the interface?
6. Do the spelling correct?
7. Do the button size similar to the other button?

**Button (Upload Signature).****1.1.1.30 Test Case (Step Based)**

2. Does it restrict users to add multiple images?

Goto:

Step 1: Click on “Upload Signature”.

Step 2: Select image then click on “Open”.

Expected Output: Should display image on certificate.

Actual Output:

3. Does it restrict users to add images of different extensions other than png?

Goto:

Step 1: Click on “Upload Signature”.

Step 2: Select an image other than PNG then click on “Open”.

Expected Output: Should display error message.

Actual Output:

4. Does there exist a size limit of image?

Go to:

Step 1: Click on “Upload Signature”.

Step 2: Select a large size image then click on “Open”.

Expected Output: Should display error message.

Actual Output:

5. Does it prompt validation for files other than images?

Go to:

Step 1: Click on “Upload Signature”.

Step 2: Select a file other than PNG then click on “Open”.

Expected Output: Should display error message.

Actual Output:

6. Does its prompt validation for images whose name contain special characters?

Go to:

Step 1: Click on “Upload Signature”.

Step 2: Select an image whose name contains a special character then click on “Open”.

Expected Output: Should display error message.

Actual Output:

#### **1.1.1.31 Guide Lines**

8. Does the quality of the image remain the same after upload?
9. Do the image colors remain the same before and after upload?
10. Does the Cursor change?

Does the textbox allow alpha characters or alphanumeric characters?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Alpha characters testing.		Data should not be acceptable.		
Alphanumeric characters testing.		Data should be acceptable.		

Does the textbox allow uppercase, lowercase or both?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Uppercase characters testing.		Data should be acceptable.		
Lowercase characters testing.		Data should be acceptable.		
Uppercase and lowercase characters testing.		Data should be acceptable.		

Does the textbox have a Max-Min character limit?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Maximum character limit testing.		Size limit should not be more than 64 characters.		
Minimum character limit testing.		Size limit should not be less than 8 characters.		

Does textbox allow numeric characters only?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Numeric values testing.		Data should not be acceptable.		

Does the textbox allow entering “Spaces” in the prefix and suffix of the entered characters in the verification code?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Check for space in the prefix and suffix.		Data should not be acceptable.		

Does the textbox allow entering “Spaces” in between the verification code?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Check for space between verification code.		Data should not be acceptable.		

Do long verification code from word or notepad are allowed?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Long verification code testing.		Size limit should not be more than 320 characters.		

Does the textbox accept only spaces as input?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>

Check for only spaces as input.		Not allowed.		
---------------------------------	--	--------------	--	--

Does the textbox allow any special characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters in verification code.		Data should not be acceptable.		

Does the textbox allow any special characters at the start or end of the verification code?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters at the start of the verification code.		Data should not be acceptable.		
Check for any special characters at the end of the		Data should not be acceptable.		

verification code.				
.				

**1.1.1.43 Test cases (Step Based)**

Does the textbox allow the user to copy verification code?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

**1.1.1.44 Guide Lines**

Do the textbox be selected from the Keyboard "tab " Button?

Do the cursor blink when clicking in the textbox?

Do the value visible when typed to the textbox?

Does the textbox's placeholder visible or not?

Does the textbox is null by default?

Does the height and alignment of text boxes are the same throughout the site?

**Button (Search).**

**1.1.1.45 Test Case (Step Based)**

Does it prompt an error if any of the fields is empty?

Goto:

Step 1: Click on “Search”.

Expected Output: Should prompt error message.

Actual Output:

Does it show a message when no records are found?

Goto:

Step 1: Click on “Search”.

Expected Output: Should display a message.

Actual Output:

Uppercase and lowercase characters testing.		Data should be acceptable.		

Does the textbox have a Max-Min character limit?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Maximum character limit testing.		Size limit should not be more than 64 characters.		
Minimum character limit testing.		Size limit should not be less than 8 characters.		

4. Does textbox allow numeric characters only?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Numeric values testing.		Data should be acceptable.		

Does the textbox allow entering “Spaces” in the prefix and suffix of the entered characters in the title?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Check for space in the prefix and suffix.		Data should not be acceptable.		

Does the textbox allow entering “Spaces” in between the characters in the title?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Check for space between the characters in the title.		Data should be acceptable.		

Do long title from word or notepad are allowed?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Long title testing.		Size limit should not be more than 320 characters.		

Does the textbox accept only spaces as input?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>

Check for only spaces as input.		Not allowed.		
---------------------------------	--	--------------	--	--

Does the textbox allow any special characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters in the title.		Data should be acceptable.		

Does the textbox allow any special characters at the start or end of the title?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters at the start of the title.		Data should not be acceptable.		
Check for any special characters at the end of the title.		Data should not be acceptable.		

#### 1.1.1.90 Test cases (Step Based)

Does the textbox allow the user to copy the title?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

#### 1.1.1.91 Guide Lines

Do the textbox be selected from the Keyboard "tab " Button?

Do the cursor blink when clicking in the textbox?

Do the value visible when typed to the textbox?

Does the textbox's placeholder visible or not?

Does the textbox contain value by default?

Does the height and alignment of text boxes are the same throughout the site?

#### Textbox (Batch Name).

#### 1.1.1.92 Test Cases (Input Based)

Do the textbox editable or not?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Editability testing.		Data should be editable.		

Does the textbox allow alpha characters or alphanumeric characters?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Alpha characters testing.		Data should be acceptable.		
Alphanumeric characters testing.		Data should be acceptable.		

Does the textbox allow uppercase, lowercase or both?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Uppercase characters testing.		Data should be acceptable.		
Lowercase characters testing.		Data should be acceptable.		
Uppercase and lowercase characters testing.		Data should be acceptable.		

Does the textbox have a Max-Min character limit?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Maximum character limit testing.		Size limit should not be more than 64 characters.		
Minimum character limit testing.		Size limit should not be less than 8 characters.		

5. Does textbox allow numeric characters only?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Numeric values testing.		Data should be acceptable.		

Does the textbox allow entering “Spaces” in the prefix and suffix of the entered characters in the Batch Name?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Check for space in the prefix and suffix.		Data should not be acceptable.		

Does the textbox allow entering “Spaces” in between the characters in the Batch Name?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Check for space between the characters in the Batch Name.		Data should be acceptable.		

Do long Batch Name from word or notepad are allowed?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Long title testing.		Size limit should not be more than 320 characters.		

Does the textbox accept only spaces as input?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>

Check for only spaces as input.		Not allowed.		
---------------------------------	--	--------------	--	--

Does the textbox allow any special characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters in the Batch Name.		Data should not be acceptable.		

Does the textbox allow any special characters at the start or end of the title?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters at the start of the Batch Name.		Data should not be acceptable.		
Check for any special characters at the end of the Batch Name. .		Data should not be acceptable.		

**1.1.1.93 Test cases (Step Based)**

Does the textbox allow the user to copy the Batch Name?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

**1.1.1.94 Guide Lines**

Do the textbox be selected from the Keyboard "tab " Button?

Do the cursor blink when clicking in the textbox?

Do the value visible when typed to the textbox?

Does the textbox's placeholder visible or not?

Does the textbox contain value by default?

Does the height and alignment of text boxes are the same throughout the site?

**Textbox (Instructor Name).**

**1.1.1.95 Test Cases (Input Based)**

Do the textbox editable or not?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Editability testing.		Data should be editable.		

Does the textbox allow alpha characters or alphanumeric characters?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Alpha characters testing.		Data should be acceptable.		
Alphanumeric characters testing.		Data should not be acceptable.		

Does the textbox allow uppercase, lowercase or both?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Uppercase characters testing.		Data should be acceptable.		
Lowercase characters testing.		Data should be acceptable.		
Uppercase and lowercase characters testing.		Data should be acceptable.		

Does the textbox have a Max-Min character limit?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Maximum character limit testing.		Size limit should not be more than 64 characters.		
Minimum character limit testing.		Size limit should not be less than 8 characters.		

4. Does textbox allow numeric characters only?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Numeric values testing.		Data should not be acceptable.		

Does the textbox allow entering “Spaces” in the prefix and suffix of the entered characters in the Instructor Name?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>

Check for space in the prefix and suffix.		Data should not be acceptable.		
---	--	--------------------------------	--	--

Does the textbox allow entering “Spaces” in between the Instructor Name?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space between Instructor Name.		Data should be acceptable.		

Do long Instructor Name from word or notepad are allowed?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Long Instructor Name.		Size limit should not be more than 320 characters.		

Does the textbox accept only spaces as input?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Check for only spaces as input.		Not allowed.		

Does the textbox allow any special characters?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Check for any special characters in the Instructor Name.		Data should not be acceptable.		

Does the textbox allow any special characters at the start or end of the Instructor Name?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Check for any special characters at the start of the Instructor Name.		Data should not be acceptable.		
Check for any special characters at the		Data should not be acceptable.		

end of the Instructor Name.			
-----------------------------	--	--	--

**1.1.1.96 Test cases (Step Based)**

Does the textbox allow the user to copy Instructor Name?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

**1.1.1.97 Guide Lines**

Do the textbox be selected from the Keyboard "tab " Button?

Do the cursor blink when clicking in the textbox?

Do the value visible when typed to the textbox?

Does the textbox's placeholder visible or not?

Does the textbox contain value by default?

Does the height and alignment of text boxes are the same throughout the site?

**Textbox (Expiry Date).****1.1.1.98 Test Cases (Input Based):**

Does it allow us to select a date less than the current date?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Lesser date testing.		Data should not be acceptable and should prompt an error.		

Does it allow the user to enter a date?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Editability testing.		Data should be editable.		

Does the textbox allow alpha characters or alphanumeric characters?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Alpha characters testing.		Data should not be acceptable.		
Alphanumeric characters testing.		Data should not be acceptable.		

Does textbox allow numeric characters?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Numeric character testing.		Data should be acceptable.		

Does the textbox allow hyphen (-) and slash (/) special characters?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Check for hyphen (-) in the date field.		Data should be acceptable.		
Check for slash (/) in the date field.		Data should be acceptable.		
Check for any special character other than hyphen (-) and slash (/) in the date field.		Data should not be acceptable.		

#### **Guideline:**

Does the calendar widget open when clicking on the date field?

Do the width and height of the calendar widget as per requirement?

Does the calendar display current month and current date is highlighted when clicking on the date field?

Does the header of the calendar widget display current month and year?

Do the users switch from one month to another using the next and previous button?

Do the user able to select and edit the date or not?

Do the date field in the format of dd/mm/yy or mm/dd/yy or yyyy?

Does it contain value by default if it was added while creating or in the last update?

**TextArea (Description).**

Do the textarea editable or not?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Editability testing.		Data should be editable.		

Does the textarea allow alpha characters or alphanumeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Alpha characters testing.		Data should be acceptable.		
Alphanumeric characters testing.		Data should be acceptable.		

Does the textarea allow uppercase, lowercase or both?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid

Uppercase characters testing.		Data should be acceptable.		
Lowercase characters testing.		Data should be acceptable.		
Uppercase and lowercase characters testing.		Data should be acceptable.		

Does the textarea have a Max-Min character limit?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Maximum character limit testing.		Size limit should not be more than 64 characters.		
Minimum character limit testing.		Size limit should not be less than 8 characters.		

4. Does textarea allow numeric characters only?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Numeric values testing.		Data should be acceptable.		

Does the textarea allow entering “Spaces” in the prefix and suffix of the entered characters?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Check for space in the prefix and suffix.		Data should not be acceptable.		

Does the textarea allow entering “Spaces” in between the characters in the description?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Check for space between the characters in the descriptions.		Data should be acceptable.		

Do long description from word or notepad allowed?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>

Long verification code testing.		Size limit should not be more than 320 characters.		
---------------------------------	--	--	--	--

Does the textarea accept only spaces as input?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for only spaces as input.		Not allowed.		

Does the textarea allow any special characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters in description.		Data should be acceptable.		

Does the textarea allow any special characters at the start or end of the description?

<b>Test Case Name</b>	<b>Input</b>	<b>Expected Output</b>	<b>Actual Output</b>	<b>Valid/ Invalid</b>
Check for any special characters at the start of the description.		Data should be acceptable.		
Check for any special characters at the end of the description. .		Data should be acceptable.		

**1.1.1.99 Test cases (Step Based)**

Does the textarea allow the user to copy description?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

**1.1.1.100 Guide Lines**

Do the textarea be selected from the Keyboard "tab" Button?

Do the cursor blink when clicking in the textarea ?

Do the value visible when typed to the textarea ?

Does the textarea's placeholder visible or not?

Does the textarea contain value by default?

Does the height and alignment of the textarea are the same throughout the site?

**Button (Upload Logo).**

**1.1.1.101 Test Case (Step Based)**

1. Does it restrict users to add multiple images?

Goto:

Step 1: Click on “Upload Logo”.

Step 2: Select image then click on “Open”.

Expected Output: Should display image on certificate.

Actual Output:

2. Does it restrict users to add images of different extensions other than png?

Goto:

Step 1: Click on “Upload Logo”.

Step 2: Select an image other than PNG then click on “Open”.

Expected Output: Should display error message.

Actual Output:

3. Does there exist a size limit of image?

Go to:

Step 1: Click on “Upload Logo”.

Step 2: Select a large size image then click on “Open”.

Expected Output: Should display error message.

Actual Output:

4. Does it prompt validation for files other than images?

Go to:

Step 1: Click on “Upload Logo”.

Step 2: Select a file other than PNG then click on “Open”.

Expected Output: Should display error message.

Actual Output:

5. Does its prompt validation for images whose name contain special characters?

Go to:

Step 1: Click on “Upload Logo”.

Step 2: Select an image whose name contains a special character then click on “Open”.

Expected Output: Should display error message.

Actual Output:

#### 1.1.1.102 Guide Lines

1. Does the quality of the image remain the same after upload?
2. Do the image colors remain the same before and after upload?
3. Does the Cursor change?
4. Do the font size similar to the other attributes in the interface?
5. Do the font color similar to the other attributes in the interface?
6. Do the spelling correct?
7. Do the button size similar to the other button?

**Button (Upload Signature).****1.1.1.103 Test Case (Step Based)**

2. Does it restrict users to add multiple images?

Goto:

Step 1: Click on “Upload Signature”.

Step 2: Select image then click on “Open”.

Expected Output: Should display image on certificate.

Actual Output:

3. Does it restrict users to add images of different extensions other than png?

Goto:

Step 1: Click on “Upload Signature”.

Step 2: Select an image other than PNG then click on “Open”.

Expected Output: Should display error message.

Actual Output:

4. Does there exist a size limit of image?

Go to:

Step 1: Click on “Upload Signature”.

Step 2: Select a large size image then click on “Open”.

Expected Output: Should display error message.

Actual Output:

5. Does it prompt validation for files other than images?

Go to:

Step 1: Click on “Upload Signature”.

Step 2: Select a file other than PNG then click on “Open”.

Expected Output: Should display error message.

Actual Output:

6. Does its prompt validation for images whose name contain special characters?

Go to:

Step 1: Click on “Upload Signature”.

Step 2: Select an image whose name contains a special character then click on “Open”.

Expected Output: Should display error message.

Actual Output:

#### 1.1.1.104 Guide Lines

8. Does the quality of the image remain the same after upload?
9. Do the image colors remain the same before and after upload?
10. Does the Cursor change?

**PUBLICATIONS**

Publish Date	Expiry Date	Batch Name	Title	Publish By	Actions
11/26/2020	Life time	er	dfger	sabih	
11/24/2020	11/27/2020	rtp	p	ismail	
11/24/2020	11/27/2020	rt	t	ismail	
11/24/2020	11/11/2020	qqw	w	ismail	
11/24/2020	12/4/2020	qq	q	ismail	

The screenshot displays two main sections of the application:

### PUBLICATIONS

This section includes a search/filter panel on the left with fields for "From Date" (mm/dd/yyyy), "To Date" (mm/dd/yyyy), and "Search" button, along with an "Enter Code" field and a "Search" button. To the right is a table with columns: Expiry Date, Life time, Batch Name, Title, Publish By, and Actions. The data in the table is as follows:

Expiry Date	Life time	Batch Name	Title	Publish By	Actions
11/27/2020	rtp	p	dfger	sabih	
11/27/2020	rt	t		ismail	
11/11/2020	qqw	w		ismail	
12/4/2020	qq	q		ismail	

Pagination controls («, ‹, 1, 2, 3, 4, ›, ») are located at the bottom right.

### BATCH CERTIFICATES

This section shows details for a specific batch: Batch Name: er, Certificate Title: dfger, Publish Date: 11/26/2020, and PublishBy: sabih. Below these details is a table with columns: Candidate Name, Candidate Email, and Actions. The data is as follows:

Candidate Name	Candidate Email	Actions
asd	sd@a.com	

Pagination controls («, ‹, 1, ›, ») are located at the bottom right.

### **1.1.2.2 Control Testing**

#### ***1.1.2.2.1 Button (Single Certificate)***

##### **1.1.2.2.1.1 Guide Lines**

1. Does the Cursor change?
2. Do the font size similar to the other attributes in the interface?
3. Do the font color similar to the other attributes in the interface?
4. Do the spelling correct?
5. Do the button size similar to the other button?
6. Do the expected result is displayed on click?

#### ***1.1.2.2.2 Button (Batch Certificate)***

##### **1.1.2.2.2.1 Guide Lines**

1. Does the Cursor change?
2. Do the font size similar to the other attributes in the interface?
3. Do the font color similar to the other attributes in the interface?
4. Does the spelling correct?
5. Do the button size similar to the other button?
6. Does the expected result is displayed on click?

#### ***1.1.2.2.3 Button (Filter)***

##### **1.1.2.2.3.1 Guide Lines**

1. Does the Cursor change?
2. Does it show a tooltip on hover?
3. Does the spelling correct?
4. Do the button size similar to the other button?
5. Does the expected result is displayed on click?

#### ***1.1.2.2.4 Button (View)***

##### **1.1.2.2.4.1 Guide Lines**

1. Does the Cursor change?
2. Does it show a tooltip on hover?

3. Does the spelling correct?
4. Do the button size similar to the other button?
5. Does the expected result is displayed on click?

#### **1.1.2.2.5 Button (Email)**

##### **1.1.2.2.5.1 Guide Lines**

1. Does the Cursor change?
2. Does it show a tooltip on hover?
3. Does the spelling correct?
4. Do the button size similar to the other button?
5. Does the expected result is displayed on click?

#### **1.1.2.2.6 Pagination**

##### **1.1.2.2.6.1 Guideline**

1. Does it display pagination on a single page with disabled next and previous buttons?
2. Does it disable the first and previous button of the first page?
3. Does it disable the last and next button of the last page?
4. Does it show more links than total page count?

#### **1.1.2.2.7 Table (Single Certificates)**

##### **1.1.2.2.7.1 Guide Lines**

1. Does data is formatted in the table?
2. Does the table visible when it has no value?
3. Does cells clickable?
4. Does table size customizable?
5. Does the table contain a header?
6. Does the Alignment of the table stay the same throughout the site?
7. Does it display duplicate records?
8. Does the pagination enable when there are more results than the default result count per page?

#### **1.1.2.2.8 Textbox (from date)**

##### **1.1.2.2.8.1 Test Cases (Input Based)**

1. Does it allow us to select a date greater than the current date?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Greater date testing.		Data should not be acceptable and should prompt an error.		

2. Does it allow the user to enter a date?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Editability testing.		Data should be editable.		

3. Does the textbox allow alpha characters or alphanumeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Alpha characters testing.		Data should not be acceptable.		
Alphanumeric characters testing.		Data should not be acceptable.		

4. Does textbox allow numeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Numeric character testing.		Data should be acceptable.		

5. Does the textbox allow hyphen (-) and slash (/) special characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for hyphen (-) in the date field.		Data should be acceptable.		
Check for slash (/) in the date field.		Data should be acceptable.		
Check for any special character other than hyphen (-) and slash (/) in the date field.		Data should not be acceptable.		

### **1.1.2.2.8.2 Guideline:**

1. Does the calendar widget open when clicking on the date field?
2. Do the width and height of the calendar widget as per requirement?
3. Does the calendar display current month and current date is highlighted when clicking on the date field?
4. Does the header of the calendar widget display current month and year?
5. Do the users switch from one month to another using the next and previous button?
6. Does the user able to select and edit the date or not?
7. Do the date field in the format of dd/mm/yy or mm/dd/yy or yyyy?

### **1.1.2.2.9 Textbox (to date)**

#### **1.1.2.2.9.1 Test Cases (Input Based)**

1. Does it allow us to select a date greater than the current date?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Grater date testing.		Data should not be acceptable and should prompt an error.		

2. Does it allow the user to enter a date?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Editability testing.		Data should be editable.		

3. Does the textbox allow alpha characters or alphanumeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Alpha characters testing.		Data should not be acceptable.		
Alphanumeric characters testing.		Data should not be acceptable.		

4. Does textbox allow numeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid

Numeric character testing.		Data should be acceptable.		
----------------------------	--	----------------------------	--	--

5. Does the textbox allow hyphen (-) and slash (/) special characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for hyphen (-) in the date field.		Data should be acceptable.		
Check for slash (/) in the date field.		Data should be acceptable.		
Check for any special character other than hyphen (-) and slash (/) in the date field.		Data should not be acceptable.		

#### 1.1.2.2.9.2 Guideline

1. Does the calendar widget open when clicking on the date field?
2. Do the width and height of the calendar widget as per requirement?
3. Does the calendar display current month and current date is highlighted when clicking on the date field?
4. Does the header of the calendar widget display current month and year?
5. Do the users switch from one month to another using the next and previous button?
6. Does the user able to select and edit the date or not?
7. Do the date field in the format of dd/mm/yy or mm/dd/yy or yyyy?

#### 1.1.2.2.10 *Button (Search)*

##### 1.1.2.2.10.1 Test Case (Step Based)

1. Does it prompt an error if any of the fields is empty?

Goto:

Step 1: Click on “Search”.

Expected Output: Should prompt error message.

Actual Output:

2. Does it show a message when no records are found?

Goto:

Step 1: Click on “Search”.

Expected Output: Should display a message.

Actual Output:

#### **1.1.2.2.10.2 Guide Lines**

1. Does the Cursor change?
2. Do the font size similar to the other attributes in the interface?
3. Do the font color similar to the other attributes in the interface?
4. Does the spelling correct?
5. Do the button size similar to the other button?

#### **1.1.2.2.11 Textbox (Code).**

##### **1.1.2.2.11.1 Test Cases (Input Based)**

1. Do the textbox editable or not?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Editability testing.		Data should be editable.		

2. Does the textbox allow alpha characters or alphanumeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Alpha characters testing.		Data should not be acceptable.		
Alphanumeric characters testing.		Data should be acceptable.		

3. Does the textbox allow uppercase, lowercase or both?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Uppercase characters testing.		Data should be acceptable.		
Lowercase characters testing.		Data should be acceptable.		

Uppercase and lowercase characters testing.		Data should be acceptable.		
---	--	----------------------------	--	--

4. Does the textbox have a Max-Min character limit?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Maximum character limit testing.		Size limit should not be more than 64 characters.		
Minimum character limit testing.		Size limit should not be less than 8 characters.		

5. Does textbox allow numeric characters only?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Numeric values testing.		Data should not be acceptable.		

6. Does the textbox allow entering “Spaces” in the prefix and suffix of the entered characters in the verification code?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space in the prefix and suffix.		Data should not be acceptable.		

7. Does the textbox allow entering “Spaces” in between the verification code?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space between verification code.		Data should not be acceptable.		

8. Do long verification code from word or notepad are allowed?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Long verification code testing.		Size limit should not be more than 320 characters.		

9. Does the textbox accept only spaces as input?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for only spaces as input.		Not allowed.		

10. Does the textbox allow any special characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters in verification code.		Data should not be acceptable.		

11. Does the textbox allow any special characters at the start or end of the verification code?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters at the start of the verification code.		Data should not be acceptable.		
Check for any special characters at the end of the verification code. .		Data should not be acceptable.		

#### 1.1.2.2.11.2 Test cases (Step Based)

1. Does the textbox allow the user to copy verification code?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

#### **1.1.2.2.11.3 Guide Lines**

2. Do the textbox be selected from the Keyboard "tab " Button?
3. Do the cursor blink when clicking in the textbox?
4. Do the value visible when typed to the textbox?
5. Does the textbox's placeholder visible or not?
6. Does the textbox is null by default?
7. Does the height and alignment of text boxes are the same throughout the site?

#### **1.1.2.12    *Button (Search)***

##### **1.1.2.12.1 Test Case (Step Based)**

1. Does it prompt an error if any of the fields is empty?

Goto:

Step 1: Click on “Search”.

Expected Output: Should prompt error message.

Actual Output:

2. Does it show a message when no records are found?

Goto:

Step 1: Click on “Search”.

Expected Output: Should display a message.

Actual Output:

#### **1.1.2.12.2 Guide Lines**

1. Does the Cursor change?
2. Does it show a tooltip on hover?
3. Does the spelling correct?
4. Do the button size similar to the other button?

#### **1.1.2.13    *Button (Filter)***

##### **1.1.2.13.1 Guide Lines**

1. Does the Cursor change?
2. Does it show a tooltip on hover?
3. Does the spelling correct?
4. Do the button size similar to the other button?
5. Does the expected result is displayed on click?

### **1.1.2.2.14    *Button (View Batch)***

#### **1.1.2.2.14.1 Guide Lines**

1. Does the Cursor change?
2. Does it show a tooltip on hover?
3. Does the spelling correct?
4. Do the button size similar to the other button?
5. Does the expected result is displayed on click?

### **1.1.2.2.15    *Pagination***

#### **1.1.2.2.15.1 Guideline**

1. Does it display pagination on a single page with disabled next and previous buttons?
2. Does it disable the first and previous button of the first page?
3. Does it disable the last and next button of the last page?
4. Does it show more links than total page count?

### **1.1.2.2.16    *Table (Batch)***

#### **1.1.2.2.16.1 Guide Lines**

1. Does data is formatted in the table?
2. Does the table visible when it has no value?
3. Does cells clickable?
4. Does table size customizable?
5. Does the table contain a header?
6. Does the Alignment of the table stay the same throughout the site?
7. Does it display duplicate records?
8. Does the pagination enable when there are more results than the default result count per page?

### **1.1.2.2.17    *Textbox (From Date).***

#### **1.1.2.2.17.1 Test Cases (Input Based)**

1. Does it allow us to select a date greater than the current date?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Grater date testing.		Data should not be acceptable and should prompt an error.		

2. Does it allow the user to enter a date?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
----------------	-------	-----------------	---------------	----------------

Editability testing.		Data should be editable.		
----------------------	--	--------------------------	--	--

3. Does the textbox allow alpha characters or alphanumeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Alpha characters testing.		Data should not be acceptable.		
Alphanumeric characters testing.		Data should not be acceptable.		

4. Does textbox allow numeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Numeric character testing.		Data should be acceptable.		

5. Does the textbox allow hyphen (-) and slash (/) special characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for hyphen (-) in the date field.		Data should be acceptable.		
Check for slash (/) in the date field.		Data should be acceptable.		
Check for any special character other than hyphen (-) and slash (/) in the date field.		Data should not be acceptable.		

#### **1.1.2.2.18    *Guideline***

1. Does the calendar widget open when clicking on the date field?

2. Do the width and height of the calendar widget as per requirement?
3. Does the calendar display current month and current date is highlighted when clicking on the date field?
4. Does the header of the calendar widget display current month and year?
5. Do the users switch from one month to another using the next and previous button?
6. Does the user able to select and edit the date or not?
7. Do the date field in the format of dd/mm/yy or mm/dd/yy or yyyy?

### **1.1.2.2.19 *Textbox (to date)***

#### **1.1.2.2.19.1 Test Cases (Input Based)**

1. Does it allow us to select a date greater than the current date?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Grater date testing.		Data should not be acceptable and should prompt an error.		

2. Does it allow the user to enter a date?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Editability testing.		Data should be editable.		

3. Does the textbox allow alpha characters or alphanumeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Alpha characters testing.		Data should not be acceptable.		
Alphanumeric characters testing.		Data should not be acceptable.		

4. Does textbox allow numeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Numeric character testing.		Data should be acceptable.		

5. Does the textbox allow hyphen (-) and slash (/) special characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for hyphen (-) in the date field.		Data should be acceptable.		
Check for slash (/) in the date field.		Data should be acceptable.		
Check for any special character other than hyphen (-) and slash (/) in the date field.		Data should not be acceptable.		

### **1.1.2.2.20    *Guideline***

1. Does the calendar widget open when clicking on the date field?
2. Do the width and height of the calendar widget as per requirement?
3. Does the calendar display current month and current date is highlighted when clicking on the date field?
4. Does the header of the calendar widget display current month and year?
5. Do the users switch from one month to another using the next and previous button?
6. Does the user able to select and edit the date or not?
7. Do the date field in the format of dd/mm/yy or mm/dd/yy or yyyy?

### **1.1.2.2.21    *Button (Search)***

#### **1.1.2.2.21.1 Test Case (Step Based)**

1. Does it prompt an error if any of the fields is empty?

Goto:

Step 1: Click on “Search”.

Expected Output: Should prompt error message.

Actual Output:

2. Does it show a message when no records are found?

Goto:

Step 1: Click on “Search”.

Expected Output: Should display a message.

Actual Output:

### **1.1.2.2.22 Guide Lines**

1. Does the Cursor change?
2. Do the font size similar to the other attributes in the interface?
3. Do the font color similar to the other attributes in the interface?
4. Does the spelling correct?
5. Do the button size similar to the other button?

### **1.1.2.2.23 Textbox (Code)**

#### **1.1.2.2.23.1 Test Cases (Input Based)**

1. Do the textbox editable or not?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Editability testing.		Data should be editable.		

2. Does the textbox allow alpha characters or alphanumeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Alpha characters testing.		Data should not be acceptable.		
Alphanumeric characters testing.		Data should be acceptable.		

3. Does the textbox allow uppercase, lowercase or both?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Uppercase characters testing.		Data should be acceptable.		
Lowercase characters testing.		Data should be acceptable.		
Uppercase and lowercase characters testing.		Data should be acceptable.		

4. Does the textbox have a Max-Min character limit?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Maximum character limit testing.		Size limit should not be more than 64 characters.		
Minimum character limit testing.		Size limit should not be less than 8 characters.		

5. Does textbox allow numeric characters only?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Numeric values testing.		Data should not be acceptable.		

6. Does the textbox allow entering “Spaces” in the prefix and suffix of the entered characters in the verification code?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space in the prefix and suffix.		Data should not be acceptable.		

7. Does the textbox allow entering “Spaces” in between the verification code?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space between verification code.		Data should not be acceptable.		

8. Do long verification code from word or notepad are allowed?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Long verification code testing.		Size limit should not be more than 320 characters.		

9. Does the textbox accept only spaces as input?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for only spaces as input.		Not allowed.		

10. Does the textbox allow any special characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters in verification code.		Data should not be acceptable.		

11. Does the textbox allow any special characters at the start or end of the verification code?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters at the start of the verification code.		Data should not be acceptable.		
Check for any special characters at the end of the verification code.		Data should not be acceptable.		

#### 1.1.2.2.23.2 Test cases (Step Based)

1. Does the textbox allow the user to copy verification code?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

#### 1.1.2.2.23.3 Guide Lines

1. Do the textbox be selected from the Keyboard "tab " Button?
2. Do the cursor blink when clicking in the textbox?
3. Do the value visible when typed to the textbox?
4. Does the textbox's placeholder visible or not?
5. Does the textbox is null by default?
6. Does the height and alignment of text boxes are the same throughout the site?

### ***1.1.2.2.24    Button (Search)***

#### **1.1.2.2.24.1 Test Case (Step Based)**

### 1.1.3.2 Control Testing

#### 1.1.3.2.1 Textbox (Code)

##### 1.1.3.2.1.1 Test Cases (Input Based)

1. Do the textbox editable or not?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Editability testing.		Data should be editable.		

2. Does the textbox allow alpha characters or alphanumeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Alpha characters testing.		Data should not be acceptable.		
Alphanumeric characters testing.		Data should be acceptable.		

3. Does the textbox allow uppercase, lowercase or both?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Uppercase characters testing.		Data should be acceptable.		
Lowercase characters testing.		Data should be acceptable.		
Uppercase and lowercase characters testing.		Data should be acceptable.		

4. Does the textbox have a Max-Min character limit?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid

Maximum character limit testing.		Size limit should not be more than 64 characters.		
Minimum character limit testing.		Size limit should not be less than 8 characters.		

5. Does textbox allow numeric characters only?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Numeric values testing.		Data should not be acceptable.		

6. Does the textbox allow entering “Spaces” in the prefix and suffix of the entered characters in the verification code?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space in the prefix and suffix.		Data should not be acceptable.		

7. Does the textbox allow entering “Spaces” in between the verification code?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space between verification code.		Data should not be acceptable.		

8. Do long verification code from word or notepad are allowed?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Long verification code testing.		Size limit should not be more than 320 characters.		

9. Does the textbox accept only spaces as input?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for only spaces as input.		Not allowed.		

10. Does the textbox allow any special characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters in verification code.		Data should not be acceptable.		

11. Does the textbox allow any special characters at the start or end of the verification code?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters at the start of the verification code.		Data should not be acceptable.		
Check for any special characters at the end of the verification code. .		Data should not be acceptable.		

#### 1.1.3.2.1.2 Test cases (Step Based)

1. Does the textbox allow the user to copy verification code?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

### 1.1.3.2.1.3 Guide Lines

1. Do the textbox be selected from the Keyboard "tab " Button?
2. Do the cursor blink when clicking in the textbox?
3. Do the value visible when typed to the textbox?
4. Does the textbox's placeholder visible or not?
5. Does the textbox is null by default?
6. Does the height and alignment of text boxes are the same throughout the site?

### 1.1.3.2.2 *Button (Verify)*

#### 1.1.3.2.2.1 Test Case (Step Based)

1. Does it prompt an error if verification code is invalid?

Goto:

Step 1: Click on “Verify”.

Expected Output: Should prompt error message.

Actual Output:

2. Does it prompt an error if verification code is valid?

Goto:

Step 1: Click on “Verify”.

Expected Output: Should not prompt error message.

Actual Output:

#### 1.1.3.2.2.2 Guide Lines

1. Does the Cursor change?
2. Do the font size similar to the other attributes in the interface?
3. Do the font color similar to the other attributes in the interface?
4. Does the spelling correct?
5. Do the button size similar to the other button?

### 1.1.3.2.3 *Link (forget certificate)*

#### 1.1.3.2.3.1 Guideline

1. Do the link is mouse hover or clickable link.?
2. Does the cursor change when the mouse hover on the link?
3. Does link color functionality work when the user hovers mouse or clicks on Link?
4. Does it display color as per requirement on mouse hover?
5. Does the link address display at the left bottom of the browser window on mouse hover?
6. Does the provided hyperlink open in the same window, Tab / new Window, Tab?
7. Does the hyperlink show any 404 error or any other error after opening?
8. Do web links should open in the mobile browser window as per requirement?
9. Does the provided hyperlink for web link as per requirement?
10. Do the hyperlinks load on time?
11. Do the hyperlinks open in all standard browsers?

12. Does the color for the web link in all browsers remain the same?

#### **1.1.3.2.4 Textbox (email)**

##### **1.1.3.2.4.1 Test Cases (Input Based)**

1. Do the textbox editable or not?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Editability testing.		Data should be editable.		

2. Does the textbox allow alpha characters or alphanumeric characters in the username of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Alpha characters testing.		Data should be acceptable.		
Alphanumeric characters testing.		Data should be acceptable.		

3. Does the textbox allow in uppercase, lowercase or both in the username of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Uppercase characters testing.		Data should be acceptable.		
Lowercase characters testing.		Data should be acceptable.		
Uppercase and lowercase characters testing.		Data should be acceptable.		

4. Does the text box have a Max-Min character limit in the username of email and domain name of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Maximum character limit testing in username.		Size limit should not be more than 64 characters.		
Minimum character limit testing in username.		Size limit should not be less than 1 character.		
Maximum character limit testing in domain name.		Size limit should not be more than 255 characters.		
Minimum character limit testing in domain name.		Size limit should not be less than 1 character.		

5. Does textbox allow numeric characters only in the username of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Numeric values testing.		Data should not be acceptable.		

6. Does the textbox allow entering “Spaces” in the prefix and suffix of the entered characters in the email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space in the prefix and suffix.		Data should not be acceptable.		

7. Does the textbox allow entering “Spaces” in between any part of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid

Check for space in username.		Data should not be acceptable.		
Check for space in domain name.		Data should not be acceptable.		

8. Do long emails from word or notepad are allowed?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Long email testing.		Size limit should not be more than 320 characters.		

9. Does the textbox accept only spaces as input?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for only spaces as input.		Not allowed.		

10. Does the textbox allow any special characters in the username of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters in username.		Data should be acceptable.		

11. Does the textbox allow any special characters at the start or end of the username of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid

Check for any special characters at the start of the username.		Data should not be acceptable.		
Check for any special characters at the end of the username.		Data should not be acceptable.		

12. Does the textbox allow any unregistered email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for unregistered email.		Should prompt unregistered email.		
Check for registered email.		Should successfully login.		

#### 1.1.3.2.4.2 Test cases (Step Based)

1. Does the textbox allow the user to copy email?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

#### 1.1.3.2.4.3 Guide Lines

1. Do the textbox be selected from the Keyboard "tab " Button?
2. Do the cursor blink when clicking in the textbox?
3. Do the value visible when typed to the textbox?
4. Does the textbox's placeholder visible or not?
5. Does the textbox is null by default?
6. Does the height and alignment of text boxes are the same throughout the site?

### ***1.1.3.2.5 Button (send detail)***

#### **1.1.3.2.5.1 Test Case (Step Based)**

1. Does it prompt an error if email is invalid?

Goto:

Step 1: Click on “Send Detail”.

Expected Output: Should prompt error message.

Actual Output:

2. Does it prompt an error if email is valid?

Goto:

Step 1: Click on “Send Detail”.

Expected Output: Should not prompt error message.

Actual Output:

#### **1.1.3.2.5.2 Guide Lines**

1. Does the Cursor change?
2. Do the font size similar to the other attributes in the interface?
3. Do the font color similar to the other attributes in the interface?
4. Does the spelling correct?
5. Do the button size similar to the other button?

### 1.1.4.2 Control Testing

#### 1.1.4.2.1 *Button (Add organization).*

##### 1.1.4.2.1.1 Guide Lines

Does the Cursor change?

Do the font size similar to the other attributes in the interface?

Do the font color similar to the other attributes in the interface?

Do the spelling correct?

Do the button size similar to the other button?

Do the expected result is displayed on click?

***1.1.4.2.2 Button (Config).*****1.1.4.2.2.1 Guide Lines**

Does the Cursor change?

Do the font size similar to the other attributes in the interface?

Do the font color similar to the other attributes in the interface?

Do the spelling correct?

Do the button size similar to the other button?

Do the expected result is displayed on click?

***1.1.4.2.3 Button (View Certification).*****1.1.4.2.3.1 Guide Lines**

Does the Cursor change?

Do the font size similar to the other attributes in the interface?

Do the font color similar to the other attributes in the interface?

Do the spelling correct?

Do the button size similar to the other button?

Do the expected result is displayed on click?

***1.1.4.2.4 Table (Client organization detail).*****1.1.4.2.4.1 Guide Lines**

Does data is formatted in the table?

Does the table visible when it has no value?

Does cells clickable?

Does table size customizable?

Does the table contain a header?

Does the Alignment of the table stay the same throughout the site?

Does it display duplicate records?

Does the pagination enable when there are more results than the default result count per page?

***1.1.4.2.5 Pagination.*****1.1.4.2.5.1 Guide Lines**

Does it display pagination on a single page with disabled next and previous buttons?

Does it disable the first and previous button of the first page?

Does it disable the last and next button of the last page?

Does it show more links than total page count?

### **1.1.4.2.6 Textbox (*Organization Name*).**

#### **1.1.4.2.6.1 Test Cases (Input Based)**

Do the textbox editable or not?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Editability testing.		Data should be editable.		

Does the textbox allow alpha characters or alphanumeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Alpha characters testing.		Data should be acceptable.		
Alphanumeric characters testing.		Data should not be acceptable.		

Does the textbox allow uppercase, lowercase or both?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Uppercase characters testing.		Data should be acceptable.		
Lowercase characters testing.		Data should be acceptable.		
Uppercase and lowercase characters testing.		Data should be acceptable.		

Does the textbox have a Max-Min character limit?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid

Maximum character limit testing.		Size limit should not be more than 64 characters.		
Minimum character limit testing.		Size limit should not be less than 8 characters.		

Does textbox allow numeric characters only?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Numeric values testing.		Data should not be acceptable.		

Does the textbox allow entering “Spaces” in the prefix and suffix of the entered characters in the Organization name?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space in the prefix and suffix.		Data should not be acceptable.		

Does the textbox allow entering “Spaces” in between the Organization name?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space between verification code.		Data should be acceptable.		

Do long Organization names from word or notepad are allowed?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid

Long Organization names testing.	Size limit should not be more than 320 characters.		
----------------------------------	--	--	--

Does the textbox accept only spaces as input?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for only spaces as input.		Not allowed.		

Does the textbox allow any special characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters in the Organization name.		Data should not be acceptable.		

Does the textbox allow any special characters at the start or end of the Organization name.?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters at the start of the Organization name.		Data should not be acceptable.		

Check for any special characters at the end of the Organization name.		Data should not be acceptable.	
---	--	--------------------------------	--

**1.1.4.2.6.2 Test cases (Step Based)**

Does the textbox allow the user to copy Organization name.?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

**1.1.4.2.6.3 Guide Lines**

Do the textbox be selected from the Keyboard "tab " Button?

Do the cursor blink when clicking in the textbox?

Do the value visible when typed to the textbox?

Does the textbox's placeholder visible or not?

Does the textbox is null by default?

Does the height and alignment of text boxes are the same throughout the site?

**1.1.4.2.7 Textbox (Organization Email).****1.1.4.2.7.1 Test Cases (Input Based)**

Do the textbox editable or not?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Editability testing.		Data should be editable.		

Does the textbox allow alpha characters or alphanumeric characters in the username of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Alpha characters testing.		Data should be acceptable.		

Alphanumeric characters testing.		Data should be acceptable.		
----------------------------------	--	----------------------------	--	--

Does the textbox allow in uppercase, lowercase or both in the username of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Uppercase characters testing.		Data should be acceptable.		
Lowercase characters testing.		Data should be acceptable.		
Uppercase and lowercase characters testing.		Data should be acceptable.		

Does the text box have a Max-Min character limit in the username of email and domain name of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Maximum character limit testing in username.		Size limit should not be more than 64 characters.		
Minimum character limit testing in username.		Size limit should not be less than 1 character.		
Maximum character limit testing in domain name.		Size limit should not be more than 255 characters.		

Minimum character limit testing in domain name.	Size limit should not be less than 1 character.		
---	---	--	--

Does textbox allow numeric characters only in the username of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Numeric values testing.		Data should not be acceptable.		

Does the textbox allow entering “Spaces” in the prefix and suffix of the entered characters in the email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space in the prefix and suffix.		Data should not be acceptable.		

Does the textbox allow entering “Spaces” in between any part of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space in username.		Data should not be acceptable.		
Check for space in domain name.		Data should not be acceptable.		

Do long emails from word or notepad are allowed?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
----------------	-------	-----------------	---------------	----------------

Long email testing.	Size limit should not be more than 320 characters.		
---------------------	--	--	--

Does the textbox accept only spaces as input?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for only spaces as input.		Not allowed.		

Does the textbox allow any special characters in the username of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters in username.		Data should be acceptable.		

Does the textbox allow any special characters at the start or end of the username of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters at the start of the username.		Data should not be acceptable.		
Check for any special		Data should not be acceptable.		

characters at the end of the username.				
--	--	--	--	--

Does the textbox allow any unregistered email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for unregistered email.		Should prompt unregistered email.		
Check for registered email.		Should successfully login.		

#### 1.1.4.2.7.2 Test cases (Step Based)

Does the textbox allow the user to copy email?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

#### 1.1.4.2.7.3 Guide Lines

Do the textbox be selected from the Keyboard "tab " Button?

Do the cursor Blink when clicking in the textbox?

Do the value visible when typed to the textbox?

Does the textbox's placeholder visible or not?

Does the textbox is null by default?

Does the height and alignment of text boxes are the same throughout the site?

#### 1.1.4.2.8 Button (*Register Organization*).

##### 1.1.4.2.8.1 Guide Lines

Does the Cursor change?

Do the font size similar to the other attributes in the interface?

Do the font color similar to the other attributes in the interface?

Do the spelling correct?

Do the button size similar to the other button?

Do the expected result is displayed on click?

#### **1.1.4.2.9 Textbox (Admin First name).**

##### **1.1.4.2.9.1 Test Cases (Input Based)**

Do the textbox editable or not?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Editability testing.		Data should be editable.		

Does the textbox allow alpha characters or alphanumeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Alpha characters testing.		Data should be acceptable.		
Alphanumeric characters testing.		Data should not be acceptable.		

Does the textbox allow uppercase, lowercase or both?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Uppercase characters testing.		Data should be acceptable.		
Lowercase characters testing.		Data should be acceptable.		
Uppercase and lowercase characters testing.		Data should be acceptable.		

Does the textbox have a Max-Min character limit?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Maximum character limit testing.		Size limit should not be more than 64 characters.		
Minimum character limit testing.		Size limit should not be less than 8 characters.		

Does textbox allow numeric characters only?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Numeric values testing.		Data should not be acceptable.		

Does the textbox allow entering “Spaces” in the prefix and suffix of the entered characters in the Admin First name?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space in the prefix and suffix.		Data should not be acceptable.		

Does the textbox allow entering “Spaces” in between the Admin First name?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space between Admin First name		Data should not be acceptable.		

Do long Admin First names from word or notepad are allowed?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid

Long Admin First name.	Size limit should not be more than 320 characters.		
------------------------	--	--	--

Does the textbox accept only spaces as input?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for only spaces as input.		Not allowed.		

Does the textbox allow any special characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters in the Admin First name.		Data should not be acceptable.		

Does the textbox allow any special characters at the start or end of the Admin First name.?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters at the start of the Admin First name		Data should not be acceptable.		
Check for any special characters at the		Data should not be acceptable.		

end of the Admin First name.				
------------------------------	--	--	--	--

**1.1.4.2.9.2 Test cases (Step Based)**

Does the textbox allow the user to copy Admin First name?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

**1.1.4.2.9.3 Guide Lines**

Do the textbox be selected from the Keyboard "tab " Button?

Do the cursor blink when clicking in the textbox?

Do the value visible when typed to the textbox?

Does the textbox's placeholder visible or not?

Does the textbox is null by default?

Does the height and alignment of text boxes are the same throughout the site?

**1.1.4.2.10 *Textbox (Admin last name).*****1.1.4.2.10.1 Test Cases (Input Based)**

Do the textbox editable or not?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid

Does the text box have a Max-Min character limit in the username of email and domain name of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Maximum character limit testing in username.		Size limit should not be more than 64 characters.		

Minimum character limit testing in username.		Size limit should not be less than 1 character.		
Maximum character limit testing in domain name.		Size limit should not be more than 255 characters.		
Minimum character limit testing in domain name.		Size limit should not be less than 1 character.		

Does textbox allow numeric characters only in the username of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Numeric values testing.		Data should not be acceptable.		

Does the textbox allow entering “Spaces” in the prefix and suffix of the entered characters in the email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space in the prefix and suffix.		Data should not be acceptable.		

Does the textbox allow entering “Spaces” in between any part of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space in username.		Data should not be acceptable.		
Check for space in domain name.		Data should not be acceptable.		

Do long emails from word or notepad are allowed?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Long email testing.		Size limit should not be more than 320 characters.		

Does the textbox accept only spaces as input?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for only spaces as input.		Not allowed.		

Does the textbox allow any special characters in the username of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters in username.		Data should be acceptable.		

Does the textbox allow any special characters at the start or end of the username of email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters at the start of the username.		Data should not be acceptable.		

Check for any special characters at the end of the username.		Data should not be acceptable.		
--	--	--------------------------------	--	--

Does the textbox allow any unregistered email?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for unregistered email.		Should prompt unregistered email.		
Check for registered email.		Should successfully login.		

#### 1.1.4.2.11.2 Test cases (Step Based)

Does the textbox allow the user to copy email?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

#### 1.1.4.2.11.3 Guide Lines

Do the textbox be selected from the Keyboard "tab " Button?

Do the cursor Blink when clicking in the textbox?

Do the value visible when typed to the textbox?

Does the textbox’s placeholder visible or not?

Does the textbox is null by default?

Does the height and alignment of text boxes are the same throughout the site?

#### 1.1.4.2.12 *Textbox (Admin password).*

##### 1.1.4.2.12.1 Test cases (Input Based)

Do the textbox editable or not?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
----------------	-------	-----------------	---------------	----------------

Editability testing.		Data should be editable.		
----------------------	--	--------------------------	--	--

Does the textbox allow alpha characters or alphanumeric characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Alpha characters testing.		Data should be acceptable.		
Alphanumeric characters testing.		Data should be acceptable.		

Does the textbox allow uppercase, lowercase or both?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Uppercase characters testing.		Data should be acceptable.		
Lowercase characters testing.		Data should be acceptable.		
Uppercase and lowercase characters testing.		Data should be acceptable.		

Does the textbox have a Max-Min character limit?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Maximum character limit testing.		Size limit should not be more than 64 characters.		

Minimum character limit testing.	Size limit should not be less than 8 characters.	
----------------------------------	--	--

Does textbox allow numeric characters only?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Numeric values testing.		Data should be acceptable.		

Does the textbox allow entering “Spaces” in the prefix and suffix of the entered characters in the password?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space in the prefix and suffix.		Data should not be acceptable.		

Does the textbox allow entering “Spaces” in between the password?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for space between password.		Data should be acceptable.		

Do long emails from word or notepad are allowed?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid

Long email testing.	Size limit should not be more than 320 characters.		
---------------------	--	--	--

Does the textbox accept only spaces as input?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for only spaces as input.		Not allowed.		

Does the textbox allow any special characters?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters in username.		Data should be acceptable.		

Does the textbox allow any special characters at the start or end of the password?

Test Case Name	Input	Expected Output	Actual Output	Valid/ Invalid
Check for any special characters at the start of the password.		Data should be acceptable.		
Check for any special characters at the		Data should be acceptable.		

end of the password.			
----------------------	--	--	--

**1.1.4.2.12.2 Test cases (Step Based)**

Does the textbox allow the user to copy passwords in a hidden mode?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should not allow copying data.

Actual Output:

Does the textbox allow the user to copy passwords in unhidden mode?

Goto:

Step 1: Select required text.

Step 2: Press “Ctrl+C”.

Expected Output: Should allow copying data.

Actual Output:

**1.1.4.2.12.3 Guide Lines**

Do the textbox be selected from the Keyboard "tab " Button?

Do the cursor Blink when clicking in the textbox?

Do the value visible when typed to the textbox in unhidden mode?

Do the value replaced by steric when typed to the textbox in hidden mode?

Does the textbox's placeholder visible or not?

Does the textbox is null by default?

Does the height and alignment of text boxes are the same throughout the site?
